

The Safe Chute™ is a bucking chute equipped with panels that provide side clearance aiding in the protection of a rider while also providing comfort for both the rider and the animal prior to the opening the side panel.

The Safe Chute™ reduces the likelihood of injury to the riders participating in rodeo sporting events.

YOU WANT TO BE THE FIRST TO PRODUCE THIS INNOVATIVE CHUTE DESIGN!

BENEFITS

Safety

The Safe Chute™ gives riders leg clearance to mount the animal safely while in the bucking chute and provides space preventing the animal from pinching the rider's legs against the side rails

Efficiency

The Safe Chute™ reduces the time to mount the animal thereby decreasing the chute release time, eliminating the need for the count down clock.
