

Sightings of a Large Black Cat by members of the community and reported to Christine Coffey and recorded on a private data base but also passed on to DPI, NPWS and HCC for their investigation and records.

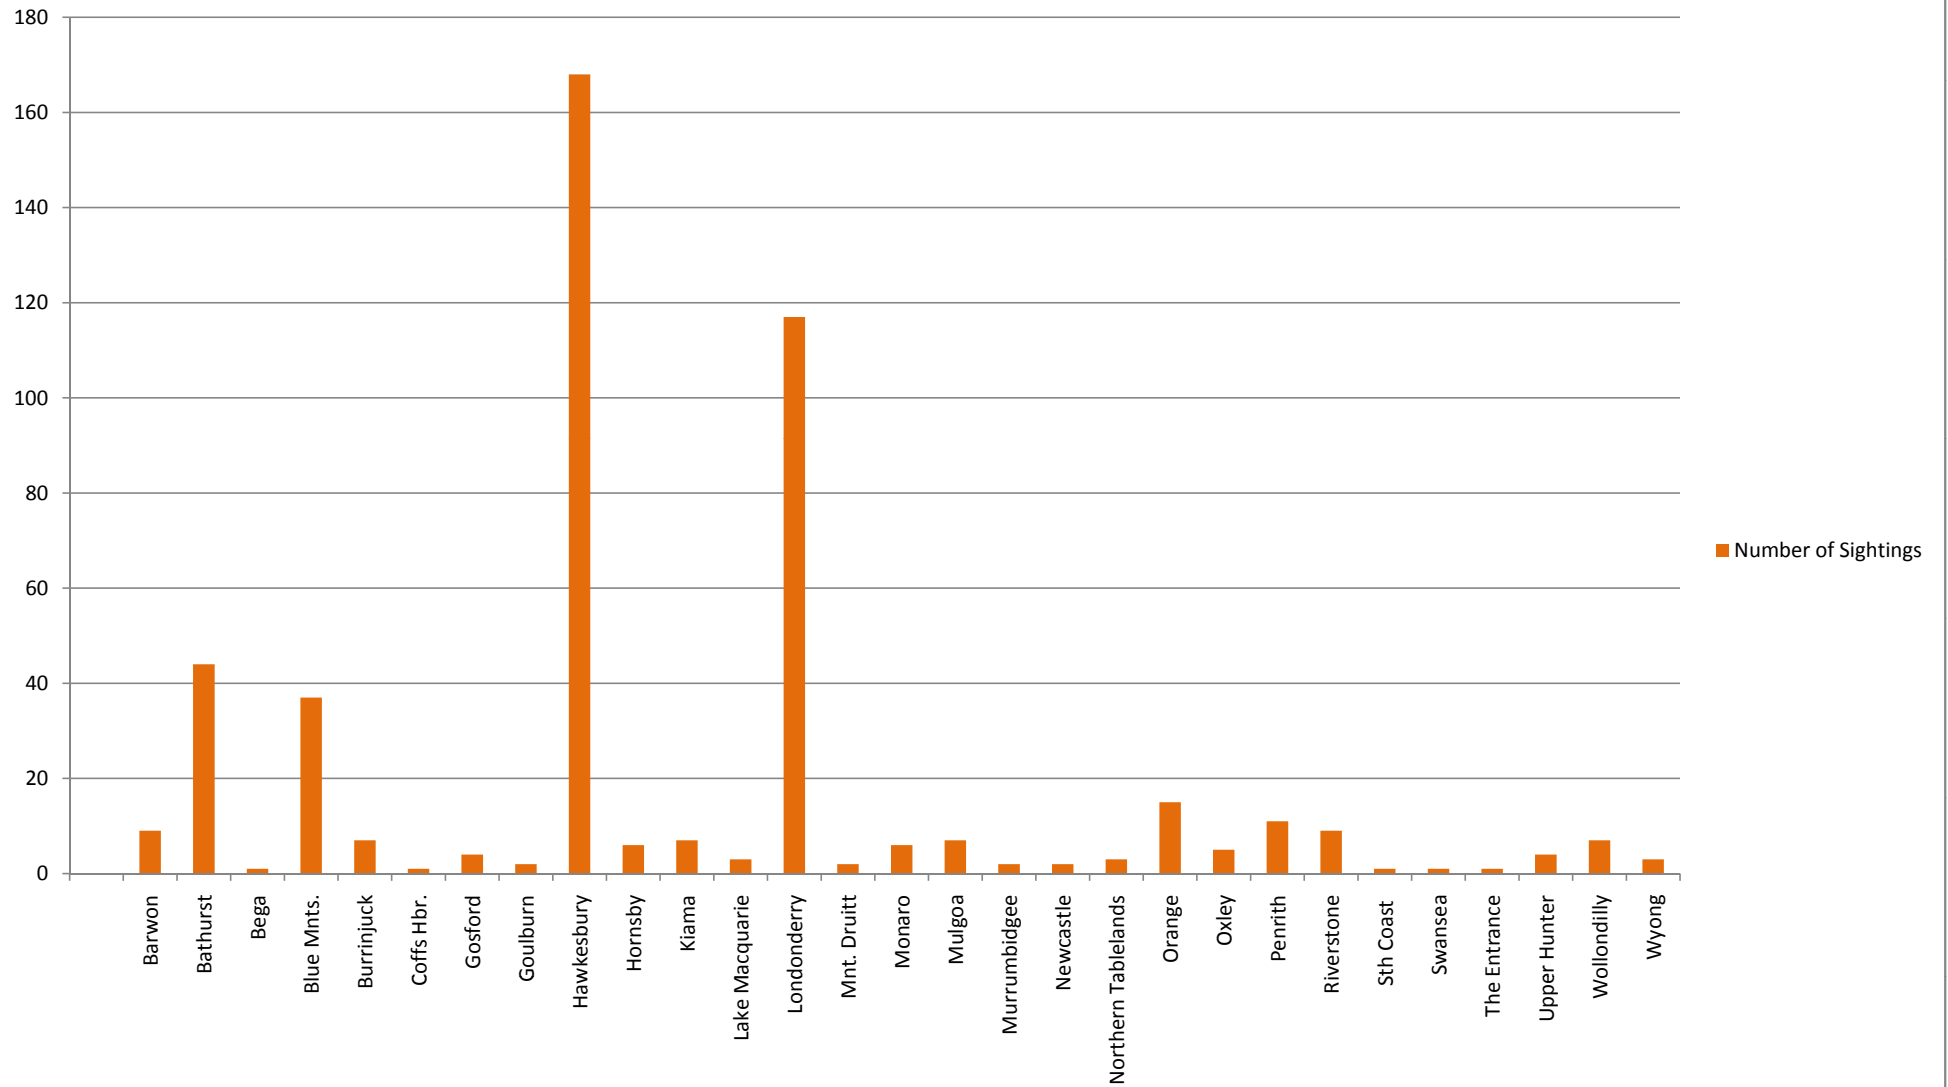

This data does not include sightings that may be recorded by DPI or NPWS who do not report information to Christine Coffey. The data also excludes many people who have rung Christine Coffey or one of her colleagues but refused to go on the data base less they were made a fool of by the media.

The attached data has been collated by suburb and by electoral area and information on reported sightings of more than one cat.

This data precludes reported animal predation and loss of stock recorded on the data base also attributed to a large carnivore believed to be a “large cat”

12th August 2012

Number of Persons Sighting Big Cats by Electorate

Sightings of more than one Cat by suburb	
--	--

Suburb	Description
Oberon	2 large black cats
Mulgoa	2 large black cats
Bowen Mnt.	1 large cat 2 cubs 3/4 the size of mum
Wollondilly	3 large cats
East Kurrajong	2 large black cats
Glen Innes	2 large black cats
East Kurrajong	2 large black cats
Glenorie	1 Large black cat with 1 cub
East Kurranjong	2 large black cats
Glossodia	1 large black with 2 cubs
Grose River	2 large black cats
Grose Vale	2 large black cats
Grose Vale	1 large cat with 1 cub
Mnt. Gilbralter	2 large black cats
Mudgee	1 Big black cat with 1 cub.

These sightings are included in the following table of sightings by suburb and by Electoral area. Both the sightings themselves and timing of other coinciding single cat sightings indicate a breeding population and not just "one big black cat"

This data is sightings only from the data base and does not included recorded loss of stock and/or predation by a large carnivor which in many cases have been verified by RLPB examining mortalities
