

## **BTC-AI One-Pager: Stephen Bell's Vision for Bitcoin's AI-Powered Future**

3PM April 18, 2025

**Author: Stephen Ronald Bell | @stephenrbell\_ | [www.btc-ai.vision](http://www.btc-ai.vision)**

### **Vision**

I, Stephen Ronald Bell, propose BTC-AI, a Bitcoin hard fork to revolutionize cryptocurrency with smart contracts, AI optimization, and Neuralink-VR mining, empowering 100 million users by 2032. Inspired by Bitcoin's limitations that constrained my MineMind and DeFiMind projects, By enabling initially 1 million low-income users to mine via brain power (\$50/month BTC-AI, \$150/month UBI), BTC-AI builds a \$1-2 billion ecosystem.

### **Problem**

- Bitcoin's Limits: No smart contracts exclude Bitcoin from \$200 billion DeFi markets (15-25% APY, 2028 QE). Inefficient data logging hampers my product MineMind (5TB mining data) and DeFiMind (1TB DeFi data).
  - Exclusion: ASIC mining costs (\$1.4-2 billion, 22-36% tariffs) lock out low-income communities.
  - Scalability: Bitcoin's 7 TX/s and \$10-\$50 fees limit mass adoption.
- At risk citizens can / will become further at risk of dystopian concepts (batteries) if not managed ethically

We can fund towards UBI ultimately, via bitcoin rewards. Fairness is important.

### **Solution: BTC-AI Hard Fork**

- Smart Contracts: EVM-compatible Layer-1 enables DeFi (\$100 billion TVL), NFTs, and DAOs, rivaling Ethereum.
- AI Optimization: Reduces mining costs by 10-15%, transaction fees by 20%, and optimizes block validation for efficiency.
- Neuralink-VR Mining: 1 million users mine BTC-AI (1,000 hashes/second, 1 TH/s) using Neuralink brain-computer interfaces, with VR gamifying 1-hour sessions, earning \$50/month BTC-AI plus \$150/month UBI, funded by \$600 million/year mining revenue.

### **Market Opportunity**

- Size: \$1-2 trillion Bitcoin market, \$200 billion DeFi, \$1 billion neural mining; 1% capture yields \$10-50 billion BTC-AI market cap.
- 2030 Advantage: 60-70% USA/BlackRock hash power (700 EH/s)

Join me as the first to reimagine Bitcoin! Download this one-pager at [www.btc-ai.vision](http://www.btc-ai.vision), follow @stephenrbell\_ on X, read my Medium post, Stephen Ronald bell on YouTube and IG .

Let's build BTC-AI for 100M users, with UBI and ESG, ethical ECI mining. Let's become backed by Saylor and BlackRock. Contact me to collaborate!

—

### **Closing thoughts**

Another chain, or country .. will do this, and ultimately control their rewards and centralise where they're spent etc

They will launch this to their citizens we need to take control and make it ETHICAL. As Bitcoin stands for, let's get ahead of it

It's time.

**The future is .. BITCOIN-AI**
