

Yuneec Simulator-Setting up a Typhoon H SIM Model on the ST16

If you have not already done it, set up a new model on the ST16

ST16 – Select System Settings then - **OK**

ST16 - Model Select then - **OK**

ST16 - New Model then - **Create new model**

Type in a name example: **SIM**, then Select model type “**Typhoon H**” then - **Save**

PC - Insert SIM dongle (**The Black Yuneec Simulator USB Receiver**)

PC - **Start the SIM**

PC - On the **SIM Menu** select: **Model** then Select: **Typhoon H** then - **OK**

PC - On the **Sim Menu** select: **Radio** then - **Bind Yuneec USB Receiver**

PC – It should now Display “Please set the Transmitter into bind mode but: **“DO NOT CLICK OK YET”**”

Now go to your **ST16** – Select: **System Settings** then - **OK**

Now your ST16 needs to find the **Yuneec Simulator USB Receiver Frequency**

Go back to your PC

PC should still be displaying

“Please set the Transmitter into bind mode then click OK”

PC - **Now you can Click OK**

PC – The SIM should now be displaying

”In the bind menu of the transmitter now select the USB receiver SRXXXX **“BUT DO NOT Click OK Yet”**”

ST16 – On the Bind Menu Press: **Refresh**

The dongle receiver name should now appear in the aircraft model window

example: **SR23s_12000.05**

NOW - Follow the these instructions EXACTLY

ST 16 - Press the receiver name: example: **SR23s_12000.05**

ST16 - Press **Bind**, ST16 now displays **“Connection established”**

ST 16 - Press **OK**

PC – SIM should still be displaying

”In the bind menu of the transmitter now select the USB receiver SRXXXX then click OK”

PC - **Now you can select OK**

PC – SIM should now be displaying:

“In order to establish the connection, return to the transmitter main screen by pressing the transmitters **back button twice**”

But - DO NOT PRESS OK ON THE PC YET

On your ST16 - Select the back button

Continued

Yuneec Simulator-Setting up a Typhoon H SIM Model on the ST16

PC – SIM should now be still be displaying:

“In order to establish the connection, return to the transmitter main screen by pressing the transmitters back button twice”

PC - **Now you can Press OK**

You should now see

PC - “The bind procedure has been completed successfully”

PC – **Now Select - OK**

Tip 1 - The Typhoon H will not take off unless the Rabbit / Turtle Slider is set to Rabbit

(Top-Right Corner of ST16, on the Underside, use your Right Index Finger and Slide it all the Way Up)

Tip 2 - If you get an “ERROR” with binding, forget messing with the program on your PC, it does not help, Turn OFF your ST16, then Turn it Back On Again.

That should do it! Now Go Fly!
