

About Governing Bodies!

GAS SAFE ENGINEERS

All our appliance installers are gas safe engineers giving you complete piece of mind that your installation is carried out correctly and in the safest way possible.

THE OFFICIAL LIST
OF GAS BUSINESSES

Trust the Triangle. By law all gas engineers must be on the Gas Safe Register to work safely and legally on gas appliances.

DON'T BE TEMPTED TO DO DIY ON YOUR GAS APPLIANCES Over a quarter of householders plan DIY work (28%) of households are planning to carry out some home improvements. Gas Safe Register is reminding people that gas work should only be carried out by Gas Safe registered engineers.

STROMA APPROVED

About Stroma.

Stroma was formed in 2002 and initially provided air testing and acoustic testing services to the construction industry. This evolved into the Stroma Tech division and by 2007 the Group had expanded to offer approved certification and training services through Stroma Certification. In 2014, Stroma Software was formed to offer desktop and mobile software to our core industry and beyond. Then in 2015 Stroma acquired CIC Approved Inspector, Greendoor Building Control, before Approved Design Consultancy and BBS Building Control also joined the Group in 2016. Through their

sister companies the Group can now provide Approved Inspector and Building Control services.

NICEIC CERTIFIED

NICEIC is the UK's leading voluntary regulatory body for the electrical contracting industry. It has been assessing the electrical competence of electricians for nearly sixty years. In addition to their core electrical business they provide certification to firms across the heating, plumbing, renewable and insulation sectors. They provide training, technical advice, certification and information on all the latest industry developments. NICEIC has developed a reputation amongst consumers, specifiers of work and industry for promoting safety, integrity and technical excellence. Our contractors undergo a rigorous assessment process, covering a representative sample of their work, documentation, equipment, their competence. They are re-assessed on a regular basis to ensure continued compliance.

NAPIT CERTIFICATION

NAPIT is one of the leading Government approved and United Kingdom Accreditation Service (UKAS) accredited membership scheme operators in the building services and fabric sector. There are currently more than 10,000 NAPIT registered installers in the electrical, heating, plumbing, ventilation, microgeneration and building fabric trades across the UK domestic, commercial and industrial markets.

NAPIT maintain a friendly, commonsense approach to competence with a continued focus on raising standards and safety within the building services sector. Though they have grown significantly since the organisation was founded, Trade Association values remain at the heart of each NAPIT division and shape the way they work with tradespeople today. NAPIT membership schemes are operated by NAPIT Registration

and NAPIT Certification, two companies which, along with other supporting NAPIT divisions, form the NAPIT Group. The companies within this rapidly expanding group – which include NAPIT Training, the NAPIT Trade Association, NAPIT Inspection, NAPIT Services, NAPIT Insurance and NAPIT Legal – work together to provide seamless routes to trade competence.

HETAS INSURED SERVICES

HETAS is a not for profit organisation offering competent person scheme for installers of biomass and solid fuel heating, registration for retailers and chimney sweeps and approval of appliances and fuels. Promote and monitor continuous improvement in the safe installation and use of solid fuel appliances, systems, chimneys & flues, and in their maintenance.

Encourage continual improvement of products and promote high standards of quality, design, safety and efficiency.

Lead the industry in updating & maintaining uniform standards of education & training at all levels to ensure safe and efficient installation and utilisation of solid fuels, systems & appliances.

Working with stakeholders to promote to the wider industry and its customers the means & benefits of achieving the safe and efficient use of solid fuels, the raising of standards & encouraging the provision of advice and guidance to solid fuel users.

Influence legislation, regulations & policies at national & international levels, that affect the use of solid fuel and solid fuel appliances, systems and related products and services.

Ensuring that HETAS is seen as offering an understandable and secure route through safety standards and relevant regulation in support of our organisational purpose.

APHC MEMBERS

About APHC - the leading plumbers association for plumbing and heating businesses in England and Wales.

The Association of Plumbing and Heating Contractors (APHC) is a not-for-profit trade body for the plumbing and heating industry in England and Wales. They have been a plumbers association since 1925 and represent large plumbing and heating companies working on commercial projects, to sole traders working in domestic properties.

Being a member of APHC distinguishes professional plumbers and heating contractors from the rogue traders. As an association we are committed to helping plumbers and heating contractors run professional and profitable businesses, whilst ensuring consumers have better standards of workmanship and service.

We work closely with key organisations such as Government, Local Authorities, Training Bodies and Consumer Organisations to ensure that best practice in the industry is promoted and that quality plumbing and heating contractors are fairly represented.

We are a source of knowledge, professional advice and support for members and consumers. Our core objectives:

To provide plumbing and heating contractors with support and cost saving benefits,
