Construction / O&M

Environmental / Compliance

Storm Water Management

Waste Services / Logistics

Dredging / Pile Driving

INTRODUCTION

Brook Ridge Consulting (BRC) was founded by seasoned professionals to meet the requirements of a diverse array of clients. Our core disciplines encircle the energy, industrial and environmental space. BRC is at the leading edge of beneficial reuse and has established deep partnering relations with some of the largest groups in North America.

BRC 4-S Process

Science

- Collect and ship representative samples of the combustion residuals and byproducts to one of our Research & Development Labs.

Screening

- Identify applicable lines of adaptive reuse, review slip stream process adjustments and set benchmark protocol for delivery.

Scale

- Develop a Quality Assurance / Quality Control plan that sets the product standard, volume distribution, and logistics. The QA/QC plan also establishes the synergy between materials processing and the working operation of the plant.

Sale

- Prepare a business model centered around the byproduct uses that numerates market intelligence, identifies long term clients/partners, and aligns with the stakeholder's vision.

ISN No. 400-252913

Mission Statement: *BRC's Flex Program allows clients to add input and develop their ideal Partner to meet their goals. This is a dynamic emerging market where flexibility, innovation, and due diligence converge to make that happen.*
