

Welcome to Maria's House, a somewhat unique collection of classical paintings, Rembrandt etchings, and militaria (i.e., medieval arms to modern weapons). Maria Chandler (see nearby obituary) had a keen sense of art, style, and design; she was particularly adept with a loving/caring demeanor and often found herself in the role of counselor to others, sometimes complete strangers. As an 18-year summer resident of Highlands, she developed a strong love of the community and her friends here. That, combined with her commitment to others, led to the creation of Maria's House shortly after her passing in late 2023. Hopefully, you will find some delight in viewing the art she and her husband have assembled over their wonderful, blessed time together.

Note, however, that the military pieces are not of interest to her but are items her husband has assembled over the last 50 years.

Enjoy your visit!
