

SITE OVERVIEW

Alinea Clinical Research partners with patients and sponsors to conduct clinical studies essential to medical research.

COMPASSIONATE. PROFESSIONAL. INNOVATIVE. ACCURATE. EFFICIENT.

Who We Are

We are an integrated clinical research site located within the Kotsanis Institute in Grapevine, Texas, and also have two additional satellite clinics in Denton and Dallas, Texas. At Alinea, our patients and sponsors are more than just numbers to us. We genuinely respect the essential roles of our patients and sponsors in influencing medical science.

We perform phases I-IV clinical trials for multiple indications. Dr. Constantine Kotsanis oversees all trials as the Principal Investigator and has over 20 years of experience in clinical research. He was the first IPT (Insulin Potentiated Therapy) doctor to be approved to do a quality of life, FDA registered, IRB approved clinical trial in Insulin Potentiation Therapy Low Dose Chemotherapy for cancer patients.

Dr. Kotsanis and Alinea Clinical Research staff share a passion to bring new and improved investigational drugs, therapies and devices to market.

Convenient Locations

Each of our three sites are conveniently located minutes from major highways, within easy access of DFW International Airport.

Possible Benefits For Our Patients

- Earn compensation and receive free medical care
- Have access to investigational medications
- Contribute to innovations in medicine
- Help other people

- Rapid start-up for any trials
- Finalized contract/budget in 4-6 days
- Large conference area with WIFI
- 8 exam rooms
- 2 dedicated lab rooms
- 6 IV rooms
- Secure drug storage
- Knowledgeable in EDC and IVRS
- Secure source document and CRF storage
- Centrifuge, ambient storage, 3 storage areas, ECG, spirometry, scale and stadiometer, thermometers, sphygmomanometer, -20 degree freezer, refrigerator (2-8 degrees celsius)

Our Areas of Research Experience

- Allergies
- Asthma/COPD
- Autoimmune Diseases
- Autism
- Cardiovascular Disease
- Cancer
- C-Diff
- Crohn's Disease
- Chronic Infection
- Constipation
- Dyslipidemia
- Fibromyalgia
- GI Issues
- Hot Flashes (Women)
- Infant Formula
- Irritable Bowel Disease
- Lyme Disease
- Migraines
- Osteoarthritis, Knee/Hip
- Pain
- Ulcerative Colitis

Recruitment and Patient Access Methods

Private practice EMR search, Study Kik, Acurian, patient database of 6,000, physician referrals, events, ads, etc.
