## What is Orton Gillingham (OG)?

Orton Gillingham is an approach that teaches reading, writing and spelling in a direct, explicit and multi-sensory way to students with dyslexia and or other language based learning differences.

## What will your child receive during Summer Education Camp?

Your child will receive one-on-one instruction with a qualified teacher to keep their skills sharp and increase confidence.

Reading instruction will build fluency, comprehension and vocabulary.

Math instruction will reinforce and extend math knowledge using games and activities.

Writing instruction will include creative writing (using speech to text), spelling, handwriting, and vocabulary/keyboarding lessons.

Using the Orton-Gillingham (OG) approach provides a structured, sequential, multisensory approach to reading and spelling instruction, allowing for individualized learning, strong phonemic awareness development, and improved fluency through consistent practice and repetition across various senses - seeing, hearing, touching, and moving; ultimately leading to increased confidence and literacy skills for students of all abilities.
