

Neuroscience DU

Are you living with relapsing multiple sclerosis (RMS)?

REMODEL-1 is a clinical study evaluating if an investigational drug with an alternative mechanism of action can help people living with RMS.

You may qualify to participate in this voluntary research study if you:

- **Are between the ages of 18 to 55.**
- **Have a diagnosis of RMS.**

Talk to your doctor for more information on the REMODEL-1 study.
