# How To Order:

# **MEASURING TECHNIQUES**

### NO LOOSE MEASUREMENTS OR FINGERS UNDER THE MEASURING TAPE

Always record the customer's height & weight, as well as his fit preference (regular or tighter fit)

Ask the customer to move his arms outward. Place the tape under his arms and around the broadest part of his chest. Have the customer lower his arms to his side and relax. **Stand** to the side of the customer to ensure the tape is level on both sides. Pull the tape until you feel tension and then record your measurement.

With the customer's arms at his side, place the tape around the broadest part of the chest and arms. Stand to the side of the customer to ensure the tape is level on both sides. **Pull the tape until you feel tension and then record your measurement.** 

Place tape around neck at the level where the shirt's collar would be buttoned. Add 1" to the measurement for the correct neck size. In the example above, a 15.5" neck measurement was taken, so a 16.5" neck size would be recorded.

Ask the customer to remove any items from his pockets. Stand to the side of the customer and place the tape around the broadest part of his hip and rear. Pull the tape until you feel tension and record your measurement.

Place the tape around customer's waist at the level he wears his pants, preferably an inch below his navel. **Pull the tape until you feel tension and record your measurement.** 

The customer's hip measurement minus 6 inches informs us that they cannot wear a waist smaller than that number. Example: 40" hip minus 6" = 34" waist; this customer could not wear a 32" waist pant. Record the larger size, 34" pant waist.

When a customer requests to wear his pants below his stomach, place the tape around his waist, under his stomach. Pull the tape snug on customers with a stomach. RECORD AS THE PANT WAIST MEASUREMENT.

Ask the customer to **<u>REMOVE HIS SHOES</u>** and look straight ahead during the measurement process. Start the tape measure level with the top of the waistband at the back of his pant and stretch the tape to the floor (with the customer's shoes off). Adjust and record the customer's outseam measurement. **Subtract 1**" from the measurement if there is no pant break preference.

Place the tape around the widest part of the customer's stomach. This measurement helps determine the proper shirt and coat size for the customer. <u>DO NOT</u> RECORD AS THE WAIST MEASUREMENT.

Start the tape at the base of the neck centered with the spine. Make sure the tape measure goes over the top of the customer's shoulder.
 Take the tape down the arm to the point of their elbow
 and then measure an inch past the wrist bone. It is always better to measure long versus short because a sleeve that is too short will likely be unacceptable to your customer.

Note: When fitting larger size shirts, you must pay close attention to the body size in relation to the neck. Heavy-set people may have a small neck size in proportion to their body. A man that has a 62" chest may have an 18.5" neck, but that shirt would not cover the width of his body.
\*Note: The Max Mid-Section measurement can be achieved by measuring around the largest part of the gentleman's stomach.
