Product Catalogue 2015

ADVANCING HYGIENE

Focusing on your business needs, we deliver leading edge health and hygiene solutions for people in their workplace or whilst they are away from home. For over 135 years our commitment to innovation and a set of simple values – quality, service and fair dealing – has helped to establish us as a leading edge, global company.

KIMBERLY-CLARK PROFESSIONAL* is the supplier of choice when it comes to hand hygiene solutions. We understand that poor hand hygiene can cause the spread of germs and cross contamination throughout a workplace. It is our aim to provide innovative solutions in skincare and hand towels to protect your employees' health and well being.

TRUSTED BRANDS - OUR BRAND PROMISES

Exceptional
Workplaces®

"Your indispensable business partner, delivering leading-edge health, hygiene and productivity solutions that provide tangible value everyday, everywhere"

"Providing you with the best care, wherever you are"

"The trusted, practical dependable choice"

"Enhanced health and hygiene systems for people and their surroundings"

"Versatile cleaning solutions trusted for performance and productivity"

"Exceptional dispensers, exceptional dispensing"

ENVIRONMENTAL

REDUCE TODAY, RESPECT TOMORROW*

At KIMBERLY-CLARK PROFESSIONAL*, we don't just talk about the environment; we take action by ensuring our sustainability programme touches every stage of the product lifecycle, from source to disposal. We're always looking for new ways to reduce the amount of natural resources we use. We call this holistic strategy, **REDUCE TODAY, RESPECT TOMORROW***.

THIRD PARTY CERTIFICATIONS

The European Ecolabel scheme encourages businesses to market products and services that are kinder to the environment. Only products that meet strict environmental standards are entitled to use the Ecolabel accreditation.

KIMBERLY-CLARK PROFESSIONAL* chose the European Ecolabel as its label of choice. The criteria for measuring performance are closely aligned with our approach to sustainability. We strive to ensure our products do what you need them to do while considering ways to reduce the environmental impact at each stage of the product life cycle.

The Ecolabel analyses the impact of the product throughout its life cycle, reflecting our life cycle approach, making it a good fit strategically for us.

PRODUCT LIFE CYCLE

Product Design

The design and structure of AIRFLEX* Fabric allows faster drying time, which can reduce consumption and waste.

Raw Materials

Products made with AIRFLEX* Fabric use 17% less fibre than standard fabrics.

Manufacturing

This product is European Ecolabel accredited. It is your guarantee of environmentally responsible manufacturing at every stage of the product life cycle.

Transport

Compression technology enables between 7% and 18% more towels to fit in a case. More product per load means fewer trucks on the road.

Use

AIRFLEX* Fabric reduces sheet usage by up to 15%¹.

More towels in a case reduces product changeover and storage space.

¹Independent market research showed that our hand towels, compared with a 1 ply conventional wiper, reduces the number of wipers used by 15%.

KIMBERLY-CLARK PROFESSIONAL*

SANITISERS & DISPENSERS

SANITISERS & DISPENSERS

• Sanitisers • Sanitising Wipes • Sanitisers Dispensers

Help reduce the risk of infection with our Instant Hand Sanitisers.

OUR HAND HYGIENE RANGE

- Hand sanitisers are highly effective against eliminating bacteria and are complimentary to good hand washing and drying procedures
- Used in conjunction with our Hand Towel and Hand Cleanser ranges, they provide a complete solution for effective hand hygiene
- Our alcohol-based hand sanitiser meets the requirements of the Biocidal Products Directive (98/8/EC)
- Kills (in as little as 30 seconds) up to 99.999% of the common bacteria, fungi, yeast and viruses that can cause infection or illness
- Reducing contamination and sanitising hands without water, in hygiene-critical areas such as healthcare and food processing environments
- Dries quickly and leaving skin feeling smooth and soft

Code - SC067355

WYPALL* L30 Wipers - Large Roll

- Long lasting 1 ply roll
- Industrial grade tissue
- Ideal for mechanical applications, mining and manufacturing, automotive and printing
- Sheet size - 270mm x 1500m (w/l)
- Packaging - 1 ROLL
- Colour - Blue
- 25 GSM
- Dispenser - Economy Floor Stand

With WYPALL* X50 and * X80, reduce the risk of cross-contamination by segregating tasks with Colour Coded Cleaning Cloths, in four colour variants. High-performing for hygienic segregated cleaning tasks. Fast, ultra-absorbent, tear-resistant and longer lasting:

- **FOUR COLOUR VARIANTS**
One for each cleaning task, reducing the risk of cross contamination, enhancing regulatory hygiene practices
- **RINSE AND REUSE**
Optimal usage, increasing the life of every cloth, helping to reduce waste and lowering cost in use
- **SUSTAINABILITY**
This product contains fibres which are PEFC* certified, promoting the sustainable management of forests
- **HYDROKNIT***
Material improves the performance qualities of the product, reducing 'in use' consumption and need for refill

Code - SC081653

WYPALL* X50 Jumbo Wiper Roll

- Highly absorbent chemically bonded rayon wipers
- Ideal for general purpose cleaning and wiping tasks
- Absorbs 6 times its own weight in oil
- Sheet size - 250mm x 400m (w/l)
- Packaging - 1 ROLL

THE Healthy WORKPLACE PROJECT*

The Healthy Workplace Project* is an innovative programme that gives you the tools and information you need to engage employees and take a truly comprehensive approach to hand hygiene.

THREE EASY STEPS let you go beyond the washroom to address germs everywhere employees take them:

Step 1

Identify all the germ hot spots in your office and understand where your employees are most vulnerable to the spread of germs.

Step 2

Provide the right tools with our range of high quality KLEENEX® and SCOTT® hand hygiene solutions.

Step 3

Take advantage of our customisable employee activation pack designed to create good hygiene behaviour.

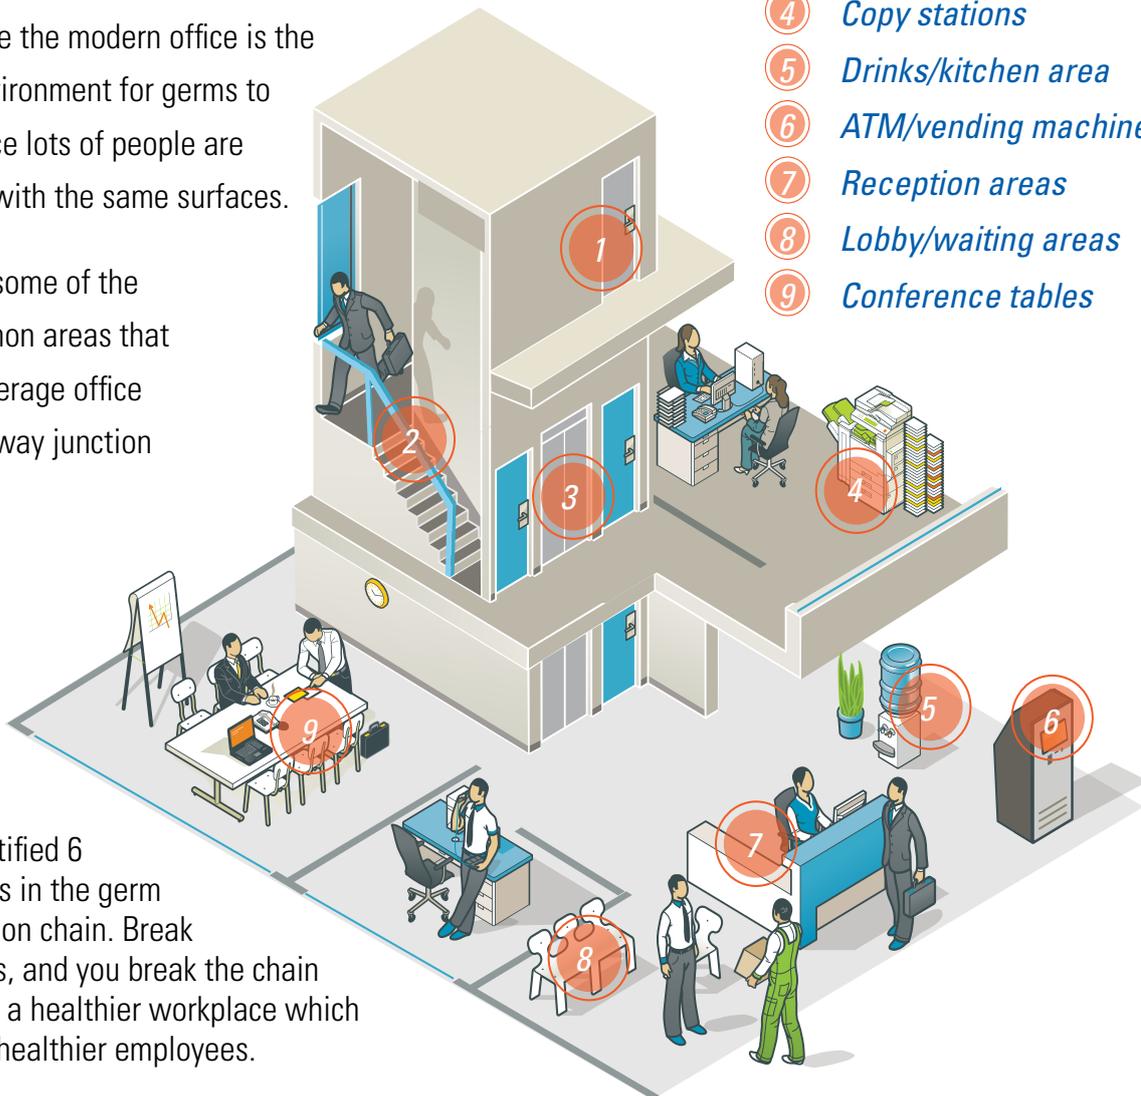

TAKE ACTION AGAINST THE SPREAD OF GERMS

The most common reasons to take sick days are colds, flu and stomach upsets.³ These illnesses are caused by germs that get passed from one individual to the next.

A space like the modern office is the perfect environment for germs to spread since lots of people are in contact with the same surfaces.

These are some of the most common areas that turn the average office into a highway junction for germs:

- 1 Doors
- 2 Stair railings
- 3 Lift buttons
- 4 Copy stations
- 5 Drinks/kitchen area
- 6 ATM/vending machines
- 7 Reception areas
- 8 Lobby/waiting areas
- 9 Conference tables

Scientists have identified 6 prime links in the germ transmission chain. Break those links, and you break the chain – creating a healthier workplace which results in healthier employees.

The six prime links are:

- After sneezing/coughing
- Beginning of a meeting
- Before eating
- In the restroom
- Beginning of the day
- End of the day

To find out more, visit our website:
www.healthyworkplaceproject.co.za

Until now, your facilities budget just gave you your supplies. Now it can be leveraged to maximise teacher and scholar attendance and engagement. The Healthy Schools Project* is the cost effective way to create healthier, more productive schools where scholars do well – because they are well.

How to get started

KIMBERLY-CLARK PROFESSIONAL* is taking the lead in helping to transform schools with high illness-related absenteeism into healthy learning environments where scholars can achieve their full potential.

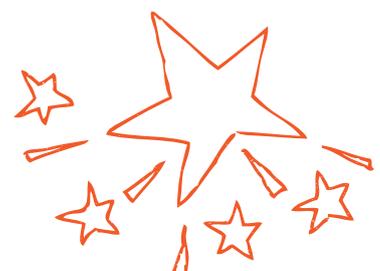

- Sustainable product solutions earn extra credit by helping to reduce environmental impact.
- Good hygiene habits, learned early and consistently reinforced, start scholars on the road to a healthy, productive life.
- Easy to fund with most or all of its implementation covered by existing facility supply funds.

The Healthy Schools Project* is designed to:

- Improve teacher and staff wellness
- Reduce scholar Absenteeism and Presenteeism (coming to school sick)
- Enhance the school's image
- Reduce the spread of germs

The Healthy Schools Project* educates and encourages students to **Wash, Wipe and Sanitise** to help reduce the risk of transmission – especially in germ hot spots.
