

## Dr. Sorbera's VIR E-Report

### Why Dr. Sorbera's VIR Professional Strength

#### What is a Virus?

**Virus:** A microorganism that is smaller than a bacterium that cannot grow or reproduce apart from a living cell. A **virus** invades living cells and uses their chemical pathways to keep itself alive and to replicate itself.

#### Did You Know Viruses play a big role in Weight Gain!

Dr. Sorbera's Anti-Aging has the weight loss solution...

VIR an exclusive anti-viral formulation, consisting of all natural herbal ingredients formulated to wipe out viruses that effect weight loss! For those that diet and exercise don't work... Dr.Sorbera's VIR just may be the solution!

#### Most Common Human Viruses:

##### Common Cold

The common cold (also known as nasopharyngitis, acute viral rhinopharyngitis, acute coryza, or a cold) (Latin: rhinitis acuta catarrhalis) is a viral infectious disease of the upper respiratory system, caused primarily by rhinoviruses and coronaviruses.

##### Influenza

Influenza is a viral infection that affects mainly the nose, throat, bronchi, and occasionally, lungs. Infection usually lasts for about a week and is characterized by sudden onset of high fever, aching muscles, headache, sever malaise, non-productive cough, sore throat, and rhinitis.

##### Rotavirus

Rotavirus is the most common cause of sever diarrhea among infants and young children and is one of several viruses that cause infections often called, stomach flu, despite having no relation to influenza.

##### Yellow Fever

The yellow fever virus is transmitted by the bite of female mosquitoes (the yellow fever mosquito).

##### Chickenpox

Chickenpox is a highly contagious illness caused by primary infection with varicella zoster virus (VZV). It usually starts with vesicular skin rash mainly on the body and head rather than at the periphery and becomes itchy, raw pockmarks, which mostly heal without scarring.

##### Shingles

Shingles is caused by the same virus that causes chickenpox.

After you have chickenpox, the virus that caused it, called varicella-zoster virus, remains in your body. It's always inside you, lying dormant (or asleep) in your nerve cells. At some point later in life, your immune system may weaken, allowing the virus to resurface as Shingles. If you had chickenpox 25-30% of the population get shingles usually between 55-65 years of age.

**Never get the Shingle Virus Vaccine the side effects can last for months 4-12.**

## **Herpes**

Herpes viruses are a leading cause of human viral disease, second only to influenza and cold viruses.

## **Hepatitis**

Hepatitis is an inflammation of the liver, most commonly caused by a viral infection.

## **Encephalitis**

Encephalitis literally means an inflammation of the brain, but usually refers to brain inflammation caused by a virus.

## **Human Papillomavirus**

While the majority of the nearly 200 known types of HPV cause no symptoms in most people, some types can cause warts (verrucae), while others can-in a minority of cases-lead to cancers of the cervix, vulva, vagina, and anus in women or cancers of the anus and penis in men.

## **HIV/AIDS**

The Human Immunodeficiency Virus (HIV) is the cause of Acquired Immune Deficiency Syndrome (AIDS). HIV can be transmitted sexually, via contaminated needles or blood transfusions, and from mother to child during pregnancy, birth, or breast-feeding.

## **Dr. Sorbera's VIR Ingredients...Professional Strength**

Lomatium Root, Echinacea Root, Astragalus root, Eleuthero Root, Rhodiola Rosea, Elderberry, Red Root, Prickly Ash, Ginger Root, Licorice Root, Garlic, Stevia Leaf Extract
