First, determine who is your **CLOSEST COMMON ANCESTOR (CCA)**. Put your Common Ancestor in Block 1 (upper left). List the direct descendants in order across the top, right to left, ending with you. List the OTHER PERSON'S descendant line down the left side ending with him/her. Follow the rows and columns to find your relationship.

(over for another example)

Common Ancestor must be your CLOSEST Common Ancestor, or the calculation will not work

|   |                  | 1                            | 2                                          | 3                                          | 4                                          | 5                                          | 6                                          |
