

**Two Elegantly Simple, Yet Incredibly Powerful,  
Pro-Democracy Reforms will -**

### **The Perfect Democracy Amendment**

will make it easier for the citizens of Missouri to call veto referendums and use the initiative to put proposals on the ballot by allowing citizens to sign petitions electronically through Online Accounts for Politically Active Citizens.

### **The Proxies for Citizens Amendment**

will ensure that every politically active citizen is represented by a senator and a representative who shares their views and values, and votes as they would vote themselves, if voting directly on issues of concern by implementing a system of Proxies for Citizens.

A **proxy** is a form authorizing someone else to vote on your behalf. The Proxies for Citizens Amendment will allow every citizen who is eligible to vote in Missouri to assign a proxy to any one member of the Missouri Senate and any one member of the Missouri House authorizing them to vote on their behalf and then give each senator and representative a number of votes equal to the number of proxies they have been assigned, plus one for themselves, on every matter voted on in the General Assembly.

Proxies can be assigned and reassigned at any time by submitting a proxy form, either electronically through Online Accounts for Politically Active Citizens or by submitting a paper form. The effect of allowing citizens to reassign their proxies at any time will be to enable citizens to vote (indirectly) on any legislation voted on in the General Assembly.
