PIG - PREVENTATIVE HEALTH CARE RECOMMENDATIONS

Dr. Bob Rednour
895 Hicks Rd.
Youngsville, NC 27596

Vaccinations

- Weaning-aged Pigs (8 weeks): Rhini Pig T4 & CDT & Circumvent. Booster in 4 weeks.
- Adult Pigs: Rhini Pig T4 & CDT once yearly
- Sows Prior to Farrowing: Rhini Pig T4 & CDT & Circumvent

***There are other risk based vaccines (i.e. Rabies vaccine) that the veterinarians may recommend based on your individual pig's risk level.

Deworming

- Deworm twice yearly
 - Alternate between Ivomec injectable and Panacur oral suspension
 - Outdoor Pigs: Ideally given in Spring & Fall
 - Indoor Pigs: Time of year is irrelevant
- Fecal exams are recommended twice yearly to determine efficacy of protocol and adjust treatment according to results.
- Sows Prior to Farrowing: Deworm with Ivomec injectable

Other

- Nutrition should be based on your individual pig's breed and life stage. Please discuss any nutrition-related concerns with our veterinarians.
