

XENOMETRIX

Swiss Commitment for Bioassays

Rapid MicroNucleus MoA – 1 hour FISH Assay – fast, reliable Genotoxicity Assessment

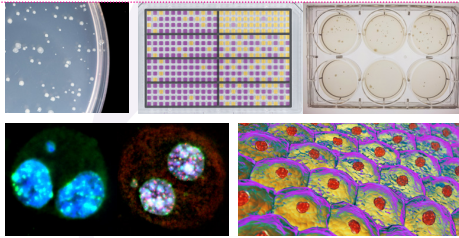

- Fast Detection of True Positive Compounds
- High specificity – no false positive results due to RNA, low-density micronuclei, precipitates, cytoplasmic alterations
- Ready to use kit including pan-centromeric probes, DAPI and reagents
- Simultaneous DAPI Counterstain
- High precision for identification of Aneugens and Clastogens
- Compliant with OECD TG487
- For all human cell lines and whole blood

XENOMETRIX

Swiss Commitment for Bioassays

Analytical Services GLP Genetic Toxicology In vitro Skin Permeation Testing

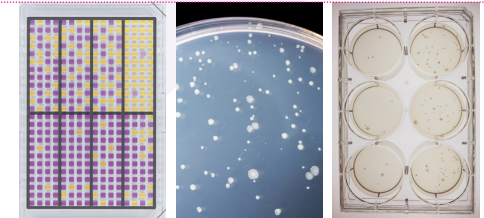

- Ames Test in Agar Plates OECD TG471
- In vitro Micronucleus Test Service OECD TG487
- In vitro Skin Permeation OECD TG428
- Miniaturized Ames Test in liquid microplate or in 6 well agar plate format ICH M7 – 65 mg of compound
- Ultraminiaturized Ames Test in 25 well agar plates – 35 µg of compound
- Endocrine Disruptive Chemicals (EDC) OECD TG455

XENOMETRIX

Swiss Commitment for Bioassays

Ames MPF – Ames II MicroAmes24 – MicroAmes6 MacroAmes1

Ames Microplate Fluctuation Assay Kits Ames Test Kit in Petri Dishes Ames 6-Well Agar Plate Kit

- Ready to use, standardized kit system
- Quality controlled kit with certificate of analysis
- Analytical Service available
