

# Getting Started with KAMI

We will be using a workbook throughout this event. You should ideally print this out or have access to it on a second screen.

If you want to access the workbook online we strongly recommend that you use KAMI. This free software is easy to access and gives you simple editing rights. Allow 5 minutes to load the software (it should be less!) <https://www.kamiapp.com/>

chrome web store

Home > Apps > Kami - PDF and Document Annotation

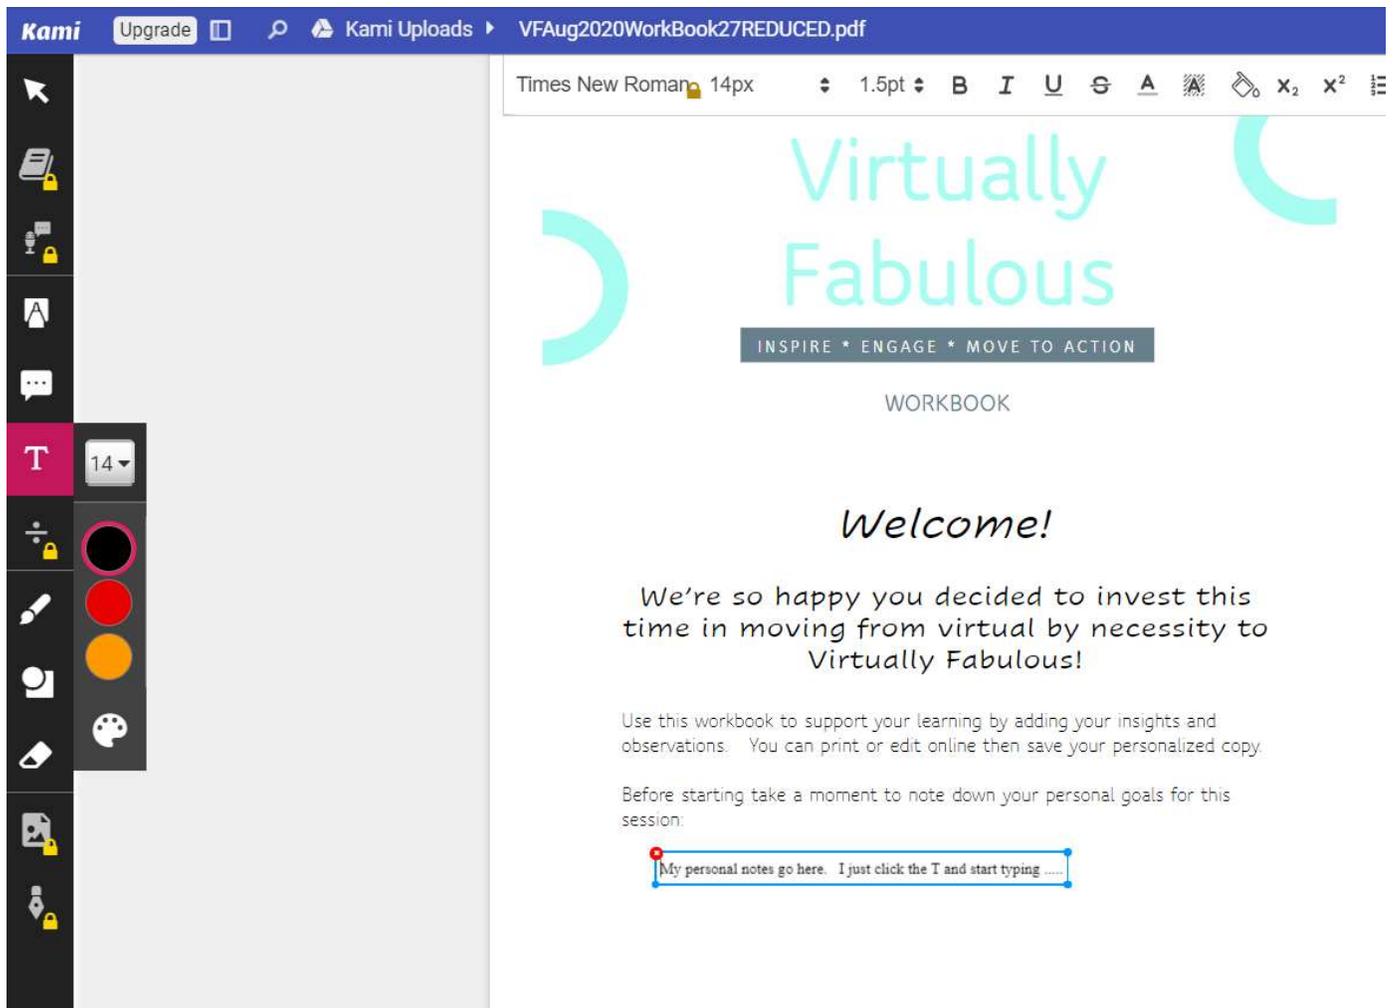

Kami - PDF and Document Annotation

Offered by: [kamihq.com](https://kamihq.com)

Works with Google Drive | Runs offline

Download the Workbook PDF and then open the file from the KAMI dialogue box. Once your PDF is accessible from the Kami screen select  from the toolbar. Now you can start creating text boxes anywhere on the PDF. Remember to save!

The screenshot shows the Kami application interface. The top bar includes the 'Kami' logo, an 'Upgrade' button, and navigation options like 'Kami Uploads' and the current document name 'VFAug2020WorkBook27REDUCED.pdf'. A toolbar on the left contains various editing tools, with the text tool (a pink square with a white 'T') highlighted. The main document area displays a PDF page with the title 'Virtually Fabulous' and the subtitle 'INSPIRE \* ENGAGE \* MOVE TO ACTION WORKBOOK'. Below the title, there is a 'Welcome!' message and a paragraph of text: 'We're so happy you decided to invest this time in moving from virtual by necessity to Virtually Fabulous!'. A text box is being created on the page, containing the text 'My personal notes go here. I just click the T and start typing .....'. The text box has a blue border and a red dot at the top left corner.
