United Music Mafia digital distribution builds a partnership with all artists. We help you build a catalog of music without a lifetime of yearly fees.

We only charge a ONE-TIME fee per release with NO yearly fees. We only keep 9% of your digital distribution revenue and you get the remaining 92%. We understand how hard it is as an artist to make it in the industry. So, we are here the help you make money not take your money like big industry. This structure incentivizes us to keep finding opportunities for artists and their music, not just your latest single.

This also means to you as the artist you won't pay a growing bill every year just to keep your music available online. Beyond our initial setup fee, United Music Mafia Distribution only makes money when you make money, so you can continue to release music with no worries.

UPC

A UPC is required to distribute each submission. That's because every digital platform reports your numbers to Nielsen SoundScan using the UPC. If you don't have one, you can get a UPC from us for just \$20 per album or \$5 per single.
