D588 – “The Falling Stars”

“Half a century passed before the next *sign* appeared, the falling of the stars from heaven, as when a fig tree casteth her unripe fruit when shaken of a mighty wind. Our Lord's words found a fulfilment (though not their complete and only fulfilment, as we shall see later) in the wonderful meteoric showers of the early morning of Nov. 13, **1833**. Those inclined to quibble by urging that “the *fixed* stars did not fall” are reminded that our Lord said nothing about fixed stars falling, and that *fixed* stars could not fall: their falling would prove that they were not *fixed*. The Scriptures do not distinguish between stars and meteors as is commonly done in our day. Shooting stars, and even meteoric showers are not uncommon every year, and some years more than others. It is computed that 400,000 small meteors fall to our earth annually. But these are nothing in comparison to the great shower of Nov. 13, 1833, in which millions on millions fell.” [4th volume pg 588-590](#)
