

# How to make co-production accessible for everyone to participate

## When creating space and supporting parent carers in participation, there are things to consider:

### Accessibility Support

- ✓ What is the families preferred communication method?
- ✓ Communication support
- ✓ Easy read materials
- ✓ Visual aids
- ✓ Translations and interpreters
- ✓ British Sign Language support
- ✓ Assistive technology (voice output, symbol software)
- ✓ Is the room/venue private? Can parent carers share their views safely?
- ✓ Are all your documents accessible online? (do they meet SCULPT guidelines)

### Physical accessibility

- ✓ Accessible venues
- ✓ Hybrid/remote options
- ✓ Quiet spaces, sensory-friendly setups
- ✓ Is the venue on good transport networks? Is there adequate parking?

### Practical help for families

- ✓ Childcare
- ✓ Travel expenses
- ✓ Digital devices or data for online meetings
- ✓ Have a pre-session for parent carers to enable them to understand the co-production process and their role

### Any other ideas

- ✓ Offer refreshments and biscuits - make the room welcoming
