

Battery Powered Device

Our battery powered device works on the principle of a beacon, turns on at a certain time, showing the location. That's why, with small sizes, the battery life is much higher than wired devices without external power. In case of theft, you can activate the real-time tracking function.

Benefits

-  Updates 1 time per day
-  Live tracking function in case of theft
-  Does not require installation (plug and play)
-  Support card slot type SIM card or patch chip card
-  WIFI+Beidou+GPS+LBS+EPO positioning
-  4G/3G/GSM works worldwide
-  Ideal for covert security for cars, boats, caravans and trailers
-  Small size and easy to hide
-  Magnetic absorption, easy installation
-  Battery life up to 3 years
-  Light sense dismantling alarm
-  Low power alarm
-  Support SMS, platform and app remote setting parameters
-  IP 67 can with stand elements
