Training Courses

Understanding how to best manage behaviour and promote positive outcomes for children & young people with SEND and/or SEMH needs

Training Courses for schools and services

Introduction to trauma informed practice

- Understanding how the child and teenage brain develops and how this differs when they have experienced trauma
- Managing behaviours for a child or young person that has experienced trauma to ensure their best potential
- Behaviour management strategies
- Understanding the stress response and how this impacts on thoughts, feelings and behaviours
- 2.5 hours / £250

Effective communication & Information sharing

- How to ensure a consistent approach to managing students with SEND & SEMH needs across all staff
- Recommended processes and procedures to ensure staff do not inadvertently put triggers in place for students with SEND & SEMH needs
- 1.5 hours / £150

A general guide to SEND & SEMH needs

- This training course is aimed at professionals that have not specialised in SEND or SEMH needs, but feel they need to have an understanding of the needs and processes involved in order to be able to support these children & young people in the best way possible
- Understanding the variety of conditions and disabilities and how to identify a need
- 2 Hours / £200

Understanding & Implementing Growth Mindset in your setting

- How to adopt a Growth Mindset culture in your setting
- How to engage children & young people with Growth Mindset to ensure they reach their best potential
- Applying Growth Mindset to young people with anxiety
- Changing the mindset of a professional
- 2.5 hours / £250

Great Minds Together - Training programs for schools and services

Our training programs are to train professionals in having a deeper understanding of:

- Growth Mindset
- How to be more trauma informed
- The psychology behind behaviour
- Positive behaviour techniques and strategies how to adopt a systematic strengths based approach
- Poor behaviour and the underlying need
- Disengagement from school
- Anxiety in young people
- Reasonable adjustments
- Effective communication strategies for a variety of learning needs
- A deeper understanding of Special Educational Needs and Disabilities (SEND) and Social, Emotional and Mental Health (SEMH) needs for professionals
- How to identify a need and what the next steps are
