

A KIDS GUIDE TO

Coronavirus

BY GREAT MINDS TOGETHER

**Viruses are VERY
common**

**In your life you will
experience many
viruses.**

**For example you
usually get a cold at
least once a year!**

**Coronavirus or COVID-19
is a new virus. Due to this
we don't know much about
it.**

**What we DO know is that it's
cousins with the Common Cold
and the Flu**

**FUN FACT: 'Corona' is
Latin for the word
Crown**

**It has travelled all around the
world, passing from person to
person along the way.**

The most common symptoms of Coronavirus are..

A high temperature (fever)

A cough

Difficulty breathing

BUT it doesn't stay for long and most people get better (especially kids!)

We can do lots of things to prevent catching coronavirus!

We can...

Wash our hands with soap & water often
(sing the **WHOLE** alphabet song while
you do it!)

Cover your mouth with a tissue when
you sneeze or cough (then put it
straight in the BIN)

Use hand sanitiser regularly and let it
dry on your hands.
(rub it in and count to 10)

If you or your family do start to feel poorly, you might have to stay at home for a while until you feel better

FUN FACT: Having to stay at home when you're sick is known as 'self isolating'

You do not need to panic if this happens to you, it's just to help stop the germs from spreading!

Scientists are currently working to find a vaccine for the coronavirus. This means that if it ever comes to say 'Hi' to you again, you wouldn't get sick. How clever is that?!

Time for a Quiz!

Question 1- What virus is the cousin of Coronavirus?

A) A cough B) the Flu C) A sore toe

Question 2- What does Corona mean in Latin?

A) Crown B) Hat C) Wig

Question 3- What is Coronaviruses Scientific name?

A) COVID-20 B) COVID-102 C) COVID-19

Question 4- What should we cough and sneeze in to?

A) A tissue B) Your sleeve C) The air

And finally...we should be cautious about the coronavirus BUT we don't need to panic.

If we follow all of the instructions from adults that look after us we will all be safe and able to beat coronavirus together!
