

Health Guarantee for Noah's Ark Labradoodle Puppies

- All Noah's Ark Labradoodle puppies are sold with a one-year replacement guarantee that covers any life-threatening genetic disease that can be directly linked to the prenatal stage and would prevent the puppy from having a long & healthy life.
- If a genetic problem is found, a letter from your licensed vet describing the condition is necessary to receive another puppy of equal value from an upcoming litter.
- Worms, parasites, umbilical hernias, and flea/ticks are not genetic and are not covered under this guarantee.
- The intention of Noah's Ark Labradoodles, also known as breeder, is to breed healthy puppies with wonderful temperaments and for the puppy to go and live a long happy life with their new adoption home.
- Before going to their new home, we, the breeder guarantee puppies to be UTD on shots and deworming's.
- Each puppy will be examined by breeder's veterinarian and buyer will receive a copy of Vet receipt visit summary in their take home puppy folder on adoption day.
- A record of vaccinations/deworming's will be provided to the buyer on puppy adoption day in their take home puppy folder.

Puppy Health Care:

- It is extremely important that you do not take the puppy to any animal frequented location (Park, Pet stores/grooming business, Dog Park, etc.), except for the veterinarian office, until 2 weeks after the final set of booster vaccinations and rabies have been administered. This is usually around 18 weeks old.
- We, the breeder recommend that you hold the puppy at the vet's office until all vaccinations are completed as this will help the puppy stay well.
- We, the breeder does not guarantee your puppy will not get sick from contact with other dogs outside our premises.

1. Buyer agrees to have puppy examined by a licensed veterinarian within 72 business hours of adoption date, and to have records proving so for this health guarantee to be in effect.

X_____ Buyer's initials

2. Buyer agrees to have all vaccinations kept current as recommended by vet, and to have records proving so. Failure to provide such documents will void all guarantees. X_____ Buyer's initials

3. Buyer agrees to properly administer flea/tick & heartworm preventative medications. Failure to provide such documents will void all guarantees. X_____ **Buyer's initials**

4. Buyer agrees to postpone strenuous exercise until the puppy is 18 months old. Strenuous exercise such as jogging, walking long distances, excessive jumping, etc. during the rapid growth stage which is 3-18 months can cause hip dysplasia. X_____ **Buyer's initials**

5. Buyer agrees to spay/neuter their new puppy companion by age of 12 months & provide documentation to the breeder. Failure to provide such documents will void all guarantees & would require the puppy/dog to be surrendered back to the breeder. X_____ **Buyer's initials**
