

Revive

Verse 1

You've heard them say, there's a great big world
With lots of fun and love like none, well I
I've seen a different kind of day when it
Hits you hard like ice in the face
The shiny glitter and dancing crowds, hurting deep from the inside out
As all that sparkle just falls to the ground as they
Bury their souls in a darkness of hell

Verse 2

From every corner you'll see a church yet the
Members inside are too lost for words
Deacons yes, guilty too. Come on everybody let's get back to
The love that our savior defined, that Agape love that slowly died
We got people running out of line and from what I read
We're in the ends of time

Verse 3

All you Christians till your hearts with, love and honor let's make a new start
God has called a purpose in this place yet we all too often hide in disgrace.
Paul once Saul gave a good line he said, a new life with death to self.

Chorus

When are we gonna stop this hate, instead of fast-forwarding in the music we
play?
Look at the agenda and the dreams we build, we're giving Satan his highway to
hell.
Take a look around, meet me on the ground, we need revival unlike one before
We need Jesus at every door.
Take a look around, meet me on the ground, we need revival unlike one before
Take a look around, meet me on the ground, we need revival unlike one before
We need Jesus at every door.
