Your **FUTURE!**

BAU Global

You have the **global education chance at BAU!**

The BAU Global Education Network is comprised of higher education institutions spread around the world. This international network welcomes students from across the globe to study at a number of locations. Students and graduates of BAU Global form an academic community that spans many countries on four continents: North America, Europe, Africa and Asia. BAU Global universities offer nearly two hundred undergraduate, graduate and doctoral programs in architecture, art, business administration, communication, design, economics, education, engineering, health sciences, information technologies, law, medicine, and social sciences.

BAU Global develops global citizens who are committed to values that benefit the entire world. The institutions in this network not only meet the standards set forth by the accreditation bodies in their home countries, but are also highly ranked in the disciplines they offer.

Student Exchange Programs

Universities that are members of the BAU Global Education Network regularly exchange students for one academic term. In this program, students can attend BAU International courses within a special agreement between universities to harmonize course content, credits, and mutual recognition of their learning achievements.

Within the framework of this network, students can spend 1 or 2 semesters in another country and experience different cultures. Bahçeşehir Cyprus University offers a contemporary world-class higher education and offers students the opportunity to study at different campuses to gain an international vision.

About BAU Cyprus

Bahçeşehir Cyprus University (BAU Cyprus) initiated education in the 2017-2018 academic year after receiving permission from local authorities for its establishment in 2016 to offer outstanding educational programmes and to provide an embracing environment for academic creativity and the development of leadership skills, instilling the concept of social responsibility, while respecting diversity and multicultural understanding. BAU Cyprus is officially recognised by the Turkish Higher Education Council (YOK) in Turkey, while all the programmes are accredited by the National Education and the Higher Education Accreditation Commission (YODAK) of the Turkish Republic of Northern Cyprus.

BAU Cyprus is a member of the BAU Global Education Network, which is comprised of several universities, Bahçeşehir University – Istanbul (main headquarter), Bay Atlantic University - Washington, Berlin International University of Applied Sciences - Berlin, BAU International University Batumi - Batumi, and Bahcesehir Cyprus University, Nicosia, which educate students from around the world in different undergraduate and graduate programmes. Its purpose is to provide the opportunity for students to benefit from academic means having an equal level, being located in different continents and countries, and getting an education on different campuses to enable them to have an international vision. All these institutions respect an identical principle; they meet the standards set forth by the local authorities and the world standards valued by independent accreditation bodies.

BAU Cyprus is constantly improving its educational infrastructure and academic staff to meet the latest world standards and to answer the demand of its increasing number of students, with the primary objective of preparing them for their future and equipping them with the creativity and leadership skills necessary for this millennium. In this regard, the university has been committed to embracing an environment for academic creativity and developing professional and societal skills while respecting diversity and multicultural understanding.

BAU Cyprus provides multi-cultural activities for students through different social clubs. Student participation can contribute to the development of personal responsibility, moral values, cooperation, emotional maturity, self-discipline, social competence, individuality, leadership, and a realization of the value of group goals.
