

OLIVO
HOMES

Welcome to OLIVO

Founded by the Spanish Architect Pablo Pesudo, OLIVO combines the Mediterranean culture with values such as heritage, strength, durability and beauty.

OLIVO was founded over 4 core pillars: reliability, confidence, quality and attention to detail, which combined provide a seamless one stop solution.

OLIVO creates spaces that go beyond functionality by designing meaningful and inspiring home experiences that will enhance their clients' quality of life.

Our Mission

Transform the renovation experience into an opportunity to create meaningful and inspiring spaces that allow our clients to live better.

We combine luxurious interiors of timeless quality through a seamless and personalized experience.

Our Vision

Become the benchmark in the design and renovation industry by transforming the existing concept into the creation of moments and spaces that go beyond their functionality.

Why OLIVO?

EXPERIENCE

At OLIVO we will inspire you to transform the vision of your home into experiences that will allow you to live and feel better.

We create moments, not spaces.

EXCELLENCE & INNOVATION

At OLIVO we use the latest production techniques and technologies, reliable products, and durable materials on every project to ensure excellence.

QUALITY

As a project management company, all our projects have the highest standards of workmanship by achieving project deadlines with a detailed execution.

PEOPLE & LEADERSHIP

In OLIVO, our main value and key to success is the integrity of our people. From recruiting talent, to selecting the right partners, we engage with you, our client, and deliver on our commitments.

Villa La Playa

PROJECTS

The design of Olivo Homes takes inspiration from nature. The design includes open layouts, double-height spaces and floor-to-ceiling windows for ample natural light. Its expansive balconies and shaded patio allow residents to dine and lounge al fresco.

The objective of this design was to create a minimalist space where the priority is to have natural light surrounded by a large garden where the client could enjoy with his family and friends.

Villa Arboleda

PROJECTS

For our client, the daily family interaction was the main aspect to get. It was important to have all the day areas interconnected, therefore we created an extension to maximize the floor plan and enlarging the openings in order to receive more natural light.

The colors and finishes create an harmony connecting the interior and exterior.

Villa Levante

PROJECTS

The general idea of that villa was to make it fresh & creative with a combination of different materials. The style of interior design is modern. The large area inside and outside makes the feeling of freedom, the materials are important for this project because of the unusual combination. The dialogue between marble, concrete & leather with gold details looked extremely interesting.

In this project the client wanted spaces with high quality materials, where the guests would appreciate it in all their rooms.

Villa Brisa

PROJECTS

The residence re-defines Modernist luxury with superlative stone, wood and metal work detailing and bespoke joinery to create a light filled home.

The refined yet calming spaces are seamlessly connected to the exterior and inner-courtyard.

In this project we wanted to be inspired by the Mediterranean villas that we can find in Spain, mixing wood with light colors.
