

A.I. bio-safety assessment for the Workplace

Maximise staff safety, occupancy and productivity, with a proven scientific approach

Risk and hotspot identification & mapping

People movement & infection modeling

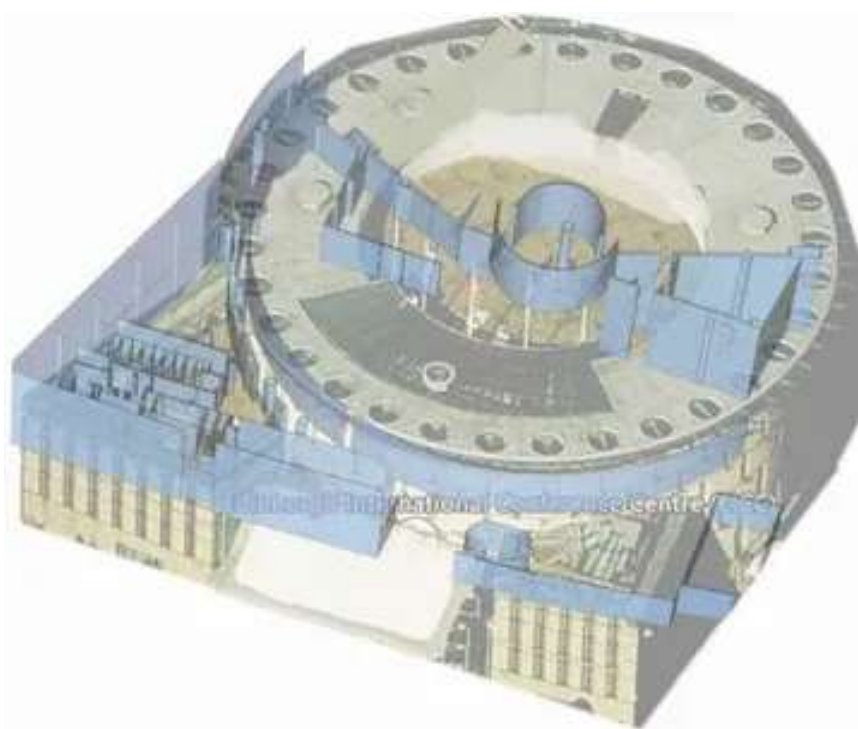

Add and test mitigation scenarios

A.I. bio-safety assessment for the Workplace

Risk hotspot identification & mapping

- Risk Scoring for your specific business situation
- Improve wellbeing and productivity
- Meet H&S standards and Govt guidelines for COVID and other workplace transmitted pathogens

People movement & infection modeling

- Uses 3D modelling of *your* building
- Best in class, global epidemiological research
- Understand how & where disease exists and propagates throughout

Add and test mitigation scenarios

- Validating mitigation options
- Optimising investment in mitigation measures
- Minimise risks to employees and other facility users
