UN Charter ("Socialist Manifesto") Commentary

Note: Parenthetical **bold** print insertions are commentator's editing.

The Purposes of the U. N. **(in order to establish an international totalitarian socialist regime)** are:

Ch. 1, Art. 1, Item 1. To maintain **(by force)** international peace **(detente)** and security--to take effective, collective measures **(to ensure the results, by whatever means may be required--military strongarm tactics, martial law, etc.)**

Item 2. To develop **(demand)** friendly relations **(tolerance)** among nations, based on equal rights\*, etc.

Item 3. To achieve international cooperation **(submission)** in solving international problems of an economic, social, cultural, or humanitarian character, etc.

Item 4. To be a center for harmonizing **(controlling)** the actions of nations in the attainment of these common ends.

**\* (Try to envision developing "friendly relations" by some system of forced equalization, or with human nature being what it is, amicably achieving any of the other objectives in the four items listed!)**

Ch. 1, Art. 1b. "Promoting **(imposing)** international cooperatiion **(enslavement)** in the economical, social, cultural, educational, and health fields, etc. **(every aspect of global activity)"** (This bylaw alone underscores the tremendous cost of the surrender of national sovereignty, when the United States signed the U. N. Treaty in 1945.)

The Principles of the U. N. are;

Ch. 1, Art. 2. The Organization and its members, in pursuit of the Purposes stated in Art. 1, Items 1-4, shall act in accordance with the following Principles.

Item 1. The Organization is based on the principle of the sovereign\* equality of all its members.

**\*(What good is sovereign equality between members? National sovereignty vs. the world is what Member Nations surrender when they accept the U. N. Charter! Member "sovereign" equality, without separate power is a non-sequitur! Be sure, that the only sovereign power rests with the U. N. hierarchy [the Security Council], and will not be dependent upon Member votes, or solicited agreement!)**

**(It certainly makes the point of William F. Buckley's statement that, "It would make greater sense to grant independence to each of the 50 states than to surrender U. S. sovereignty to a world organization.")**

Item 2. All Members, in order to ensure to all of them the **(restrictive)** rights and benefits resulting from membership, shall fulfill the obligations assumed by them in good faith **(forced compliance)**, in accordance with the present Charter. **(Imagine the unwieldiness of such an impossible responsibility, on a worldwide scale).**

Item 3. All Members shall settle their international disputes by peaceful means in such a manner that international peace **(superficial, or forced restraint)** and security **(UN limited)**, and justice **(per UN judgment)**, are not endangered.

Item 4. All Members shall refrain in their international relations from the threat or use of force **(UN controlled)** against the territorial integrity or political independence **(mutual dependence)** of any state, or in any other manner inconsistent with the Purposes of the UN.

Item 5. All Members shall give the UN every assistance in any action it takes in accordance with the present Charter **(as in mandatory coalition)** and shall refrain from giving assistance to any state against which the UN is taking preventive, or enforcement **(bullying)** action. **(With fascist style expediency, and use of force if necessary, unless the UN has by that time disarmed the world' citizens, as planned).**

Item 6. The organization shall insure **(by force, etc.)** that states which are not Members of the UN act in accordance with these principles as far as may be necessary for the maintenance of international peace and security. **(Sounds like**

**the all-too-familiar "forced unionism", whereby non-union workers have to submit to union rules).**

Art. 11. Principles governing disarmament (?), and the regulations of armaments (?). **( A general statement, without specific details, leaves the door open for unlimited regulation and control. The first law of nature is self-preservation, or survival by any available means equal to, or superior to the threat posed by a possible assailant! The right to bear arms is incontrovertibly logical, and essential! No contrary, disabling law should ever be imposed against that natural right, nor should it be obeyed at any cost, or loss of liberty. Nothing would justify national revolution against abuse of authority, more than that crucial human right!)**

Art. 13. The General Assembly shall initiate studies and make recommendations for the purpose of:

Promoting **(mandating)** international cooperation in the political field and encouraging the **(progressive, relative, ever-changing)** development of international law and its codification.

Art. 14. Subject to Article 12/the Security Council, and the General Assembly may recommend measures for settlement, etc. of any situation. **(A key factor is that the U. N. General Assembly is subject to the Security Council in any dispute or situation, not settled to the Security Council's satisfaction, with the practically meaningless provision that the General Assembly may recommend measures for settlement, etc. of any situation. Does that not mean that any majority decision, or vote of Member nations, can be overruled, or changed at the whim of the Security Council authority?)**

Art. 15. The General Assembly shall receive and consider annual and special Security Council reports. **(But without authority to change anything. Logic alone ought to tell us what is inherently wrongheaded with any form of centralized government control, as history has proven in every institution of it! By its very nature every form of it subjugates countries to absolute, remote government control, which is nothing less, essentially, than tyranny).**

**The following four paragraphs are also editor's comments.**

(The critical question has to be: Why would any independent, prosperous, free nation submit itself (its people) to the total control of a remote entity whose ideal purposes and principles have no realistically possible means of actual fulfillment? Its a far less extreme fantasy than natural evolution, but still of the same imaginary, far-fetched nature).

(A similar example of other such foolish decisions in life, is of those who have submitted to the mind controlling, occultish, sworn to secrecy, membership in, i.e., the "Brotherhood of Death", Skull and Bones Society, associated with Yale University! Many fraternities, and especially Lodges incorporate similar secret oaths, and occult rites and other strange actions, and indulgences!)

(Buckley also said that, "No superstition or fantasy, [except the theory of evolution\*] has more effectively bewitched America's Liberal elite than the fashionable concepts of world government, the United Nations, internationalism, international atomic pools, etc. Perhaps the most important and readily demonstrable lesson of history is that freedom goes hand in hand with a state of political, decentralization, and that **remote government is irresponsible government.**") \*Commentator's note.

(Probably from peer pressure in his younger years, Buckley was a member of the Skull and Bones Society. But, per above, he was strongly opposed to their one-world government goal. Yet, he is listed as a member of the Council of Foreign Relations, which doesn't reconcile, unless he had possibly infiltrated the organization as an opposing observer, or moderating element. If there is not such a possible justification, then he is questionable, like so many other of his peers!)

Art. 18. Decisions of the General Assembly on important questions (**i.e., rights, and privileges of membership, is another indication of required submission to elected authority, on practically any issue tht could arise, or be manufactured by the Elite rulers**).

Art. 19. U. N. Member nations which are in arrears for payment of financial

contributions (assessed dues, etc., may be allowed to vote in the General Assembly, if the General Assembly is satisfied (per fair judgment, or arbitrary decision?) that the failure to pay is due to conditions beyond the control of the Member. (This refers to internal national matters, but the phrase "beyond the control of the Member" pretty well characterizes the independent power and authority of the U. N. Charter, and the administrative control of the Security Council).

Art. 26. The Security Council is to determine formulation of the system for regulations of the world's human and economic resources (i.e., military personnel, armaments, logistics, energy supplies, food supply and distribution, infrastructure, etc. Which all amounts to a "license to steal" whatever the powers that be want! Just another grim reminder of what is in store for the **subordinate, enslaved nations**, which it is important to note, were forced into slavery by their "trustworthy" administrative and congressional leaders).

(Since a basic faulty principle of equality governs the U. N. administration of national rights and privileges, the **redistribution of "surplus" wealth** is the equalizer. Any instance of non-cooperation (?), or attempted cheating against the system, will no doubt be handled expeditiously, and probably with iron-fisted Gestapo methods, if "necessary"! Governmentally imposed restrictive living conditions equates to a form of servitude--denying natural, or even democratic freedom)!

Art. 31. Any Member of the U. N. which is not a member of the Security Council may participate without vote, in the discussion of any question brought before the Security Council, whenever the latter considers that the interests of that member are specially affected. (A meaningless qualification; of little value).

Art. 32. The Security Council shall lay down such conditions as it (arbitrarily) deems just for the participation of a state in a dispute, which is not a Member of the U.N.

Art. 33. 1. The parties to any dispute shall seek a peaceable solution by any of various means (approved agencies, etc.) 2. The Security Council, if deemed

necessary, shall call upon **(that is, shall direct)** parties to settle disputes, or:

Art. 36. 1. The Security Council may at any time, or stage of the dispute, recommend **(order)** appropriate procedures or methods of adjustment. **(In other words, the parties are on a short leash of control)**. 3. ....legal disputes should as a general rule be referred by the parties to the International Court of Justice, per Statute of the Court. **(As if a closely affiliated International Court would act independently, and justly).**

Note:

The remainder of this commentary does not directly edit U. N. Charter articles, but deals with various aspects of what should be seen by every loyal American, as the highly dangerous one-world government conspiracy that is overwhelmingly evident to anyone that is conscientious enough to want to know the truth of the behind-the-scenes subversive actions of double-dealing agents we thought we could trust!

In his book, *The United Nations Exposed* (July 30, 2001), U.N. expert William F. Jasper provided "new and shocking insights into how a transnational elite is using the United Nations as a mechanism to bring into being a despotic "new world order." An example being, the U. N. aim "to supervise personal disarmament on a global scale--a truly chilling development." Further, that the danger of a U.N. dictatorship "emanates not so much.....from the UN itself, or any foreign, external source as it does from those within our own government who seek to impose a "new world order" upon us."

As to the obvious question of why it has taken so long (since the 1945 signing on to the U. N. Charter), for the organization to take control of the world, after they were authorized through treaties to institute and administer control of member nations, and eventually the entire world, the following explanation is informative, from the Deanna Spingola commentary, "The New World Order, Stage-managed Morality":

"According to the Hegelian Dialectics (thesis, antithesis, synthesis, or problem,

reaction, solution (consensus process mandated for all Member issues), **there must be a "crisis", or controlled opposition**, with a predetermined solution designed **to move society towards a one-world government.**

"Opportunistic circumstances are devised by positioning effectual, charismatic people into situations where they can manipulate perceptions, and then ultimately use their increasing power **to establish and escalate minor concerns into major calamities.** The elite (hierarchy) manufactures and finances fear, in order to generate weakness for the sole purpose of putting the masses under their control."

The Brundtland report of the U. N., "Our Common Future", explains how **environmentalism (particularly the scare tactics of "global warming", "epidemics", "food shortages", etc.)** could be used as a tool **to control all the people of the world**, and establish a one-world government." The Earth Summit Planner proposes "an array of actions which are intended to be implemented by **every person on earth**--calling for specific changes in the activities of all people, in effective execution of Agenda 21, requiring a profound **reorientation of all humans**, unlike anything the world has ever experienced.

It is to be noted that President George H. W. Bush, in his global "height of grandeur", or fantasy, was fully involved in the sell-out of America's sovereign nationhood, notably in his 9/11/91 address to the nation, expressing one-world doctrine as the universal answer to the problems of world strife and tribulations. It is also significant that his father Prescott Bush, a Skull and Bones "Adept", supported Hitler and the Nazi machine, which espoused a **one-world government ideology!** It is interesting that the related word "skullduggery" well fits the underhanded operating methods of the one-worlders!

Certain aggressive, or cultish religions, and occult, and sometimes licentious secret societies can foster beliefs, and actions that seriously threaten national freedom and security! They commonly incorporate various methods of mind control, which is the stuff of the devil, and as with all his works, can only be evil--in his preoccupying rebellion against God, and anything righteous and good, which

emanates from Him!

Reference is made later to a partial list of the many notable men and women who were, and are members of secret societies, and shadow government organizations, i.e., the Council of Foreign Relations, and the Trilateral Commission especially, with the real and potential dangers to which they have subjected this and other countries, and who by their subversive association are not only unpatriotic, but traitorous!

It would be surprising to note how comparatively few significant names are not involved, who, if they disagree with the movement, should be exposing the socialist plot to manipulate and hoodwink our sovereign, constitutional republic into being just one more interdependent, subordinate nation at the mercy of the elite, ruling cabal, self-authorized to administer the UN Charter's dictatorial regulations! It is hard to imagine anything more ridiculous, and unworkable than a global, centralized government. Washington D.C.'s usurpation of power, and colossal bureaucratic malfunctioning, and malfeasance should have taught us that!

Quoting from *The Brotherhood and The Manipulation of Society*, "Almost a century before Columbus, the Knights Templar (secret society) had reached North America and had already begun trading with, and exploiting the native nations there." I don't know if this is true history or not! Also, I have serious doubts if some of the sordid details of accusations relating to certain presidents, and others who were members of "brotherhoods", could all be true!. At least, I certainly hope not. Things are bad enough without that alleged perverse conduct! Yet, nothing should surprise us!

Freemasonry (the Masonics) is the latest incarnation of a "Christian"/military order known as the Knights Templar, who gained staggering riches and wealth of esoteric (secret, private) knowledge (of the order) during the Crusades, in which the righteous (nominal) Christians (Roman Catholics) were dispatched to the Holy Land with free reign to slaughter the Jews and Moslems, in a series of campaigns between the 11th and 13th centuries.

As to the National capitulation and surrender to a realistically impossible

philosophical theory, it is both irrational and foolish! It would be like a person giving away his farm, and becoming a sharecropper. The truly exceptional country that America has been, has nothing to gain for itself, or does any other country, by giving up any of its capitalistic methods and resources in exchange for what is nothing better than historically unproductive, socialistic tyranny!

If the full scope of the New World Order comes into being, the United States as a free republic will be history, having traded its precious sovereign independence, freedom, and exceptionalism for the restrictive, enslaving status of an interdependent member nation, taking its place with all the other socialist failed societies of history!

"Thanks" will be due to the long line of turncoats like David Rockefeller, Rothschild, and other international bankers, the George Bushes, Jimmy Carter, Zbigniew Brezinski, Henry Kissinger, Bill Clinton, Colin Powell, Paul Volcker, Alan Greenspan, John McCain, George Mitchell, Walter Mondale, John Kerry, and many others. The John Birch Society correctly advises us that "We must rid ourselves of the propensity to support those who classify themselves as conservatives, and we must stop blindly supporting the GOP "because it is a 'conservative' party. If they do not understand and OPPOSE the New World Order, they do not deserve our support or our vote!"

Again, from Spingola, as for part of the clandestine, inner workings of global activists in our country, "The CIA, primary functionary of big business and international banking, recruits naive but willing college students", who "as newly trained individuals are systematically entrenched within every facet of society\_in order to **obscure our perceptions, dismantle our values, falsify our history, corrupt our communities and destabilize families.** Conventional appearing infiltrators, posturing as benefactors are **imbedded within the government, the courts, the media, the fields of medicine and psychology, and religion."**

(They are like tumors, which if not excised, may further metastasize, and destroy the traditional free, sovereign republic that has graced the world by its exceptionally successful social and industrial free society! To accomplish the NWO conspirators' goals, **no strong institution can be allowed to stand** as an obstacle to

their planned usurpation of control, and socialistic conversion of America, which has traditionally stood, at the top of the world's leading economies, and sovereign, free countries!

Picking up again from Deanna Spingola, "Combined with the junk science of the Kinsey sex study reports, cultural crises arose, destroying family and other societal norms, for which as she states, the successful escalation of every synchronized crisis, depends on mass media deception." She further adds that, "As defined by the founding fathers, a free press should serve the public interest, not the opportunistic tyrants who have absconded with the reins of government."

Regarding the behind-the-scenes, one world government consuming ambition of the Trilateral Commission, Senator Barry Goldwater warned in his book, *With No Apologies*, "This may cost me everything that I have, but I've got to get out an alert to the American people. The Trilateral Commission represents a skillfully coordinated effort to seize control and consolidate the four centers of power, **political, monetary, intellectual, and ecclesiastical.** What the trilateralists intend is the creation of a world-wide economic power superior to the government of the nation states. In other words, what they are driving, orchestrating, meshing and gearing to accomplish is the **New World Order**, the **one-world government.**" Where were Goldwater's compatriots, and where are they today? It must be that most congressional leaders, and other prominent national figures are either scared, brainwashed, or intentionally complicit in the subversive conspiracy against our government, and fellow countrymen!

Of the U. N. founding fathers, the very prominent David Rockefeller, in his autobiography wrote, "For more than a quarter of a century, ideological extremists at either end of the political spectrum have seized upon well-publicized incidents.....to attack the Rockefeller family for the inordinate influence they claim we wield over political and economic institutions. Some even believe we are part of a secret Cabal working against the best interests of the United States, characterizing my family and me as 'internationalists', and of conspiring with others around the world to build a more integrated global political and economic structure--one world, if you will. If that's the charge, I stand guilty and am proud

of it."

And, then, in sharp contrast, he says, " I don't think that I really feel that we need a world government. We need governments of the world that work together and collaborate (an unlikely miracle). But, I can't imagine that there would be any likelihood, or even that it would be desirable to have a single government elected by the people of the world ( that is, by their "representative" statesmen). There have been people ever since I've had any kind of position in the world who have accused me of being a ruler of the world. I have to say that I think for the large part, I would have to decide to describe them as crackpots. It makes no sense whatsoever, and it isn't true, and to raise it as a serious issue, seems to me to be irresponsible." (Which is exactly what he and the other utopian dreamers and schemers are guilty of)!

Having clearly agreed to what he had been accused of in the first quote, some of the things he denies in the second one, but which his life history confirms, just don't reconcile on a number of issues. Did he really think that such a doubleminded switch would earn him any trust with the opponents of the global conspiracy? How much more disingenuous can one get, than to make such contradictory public statements? His history belies any conceivable change in his obsession with the New World scheme! Obfuscation is, of course, a common practice of the NWO conspiratorial purveyors, and with a victory at any cost negative principle, truth and honesty are often obstacles that get in the way!

The UN expert, William Jasper, says the only sensible strategy is to go after the UN foundation itself, for their subterfuges and assaults, and by employing all the resources of "genuine leadership of patriotic Americans interested in maintaining their liberties and independence." To accomplish which, I would add, let it be by secession, or revolution, or any honorable means!

Jasper's book reviewer, Thomas Eddlem quoted an ancient Chinese military strategist, Sun Tzu, who said "If you know the enemy and know yourself, you need not fear the result of a hundred battles. If you know yourself, but not the enemy, for every victory gained you will also suffer a defeat. If you know neither the

enemy nor yourself, you will succumb in every battle."

Consider certain UN proposals: (1) the 1998 International Criminal court treaty to be able to bring any person in the world to trial, (2) reinvigorated pressure for global taxing power, and (3) a 1999 proposal to outlaw private firearms ownership globally! And, that is only an example of an overwhelming master plan to radically change the traditional ways of life, for the worse, of every nation on earth, and its inhabitants!

Jasper says the greatest danger "emanates not so much from the UN itself, or any foreign, external source as it does from those within our own government who seek to impose a 'new world order' upon us." He calls them "a cabal of one-world insiders," who have gained control of the Federal government, the Democratic and Republican parties, many major corporations, universities, think tanks, and tax-exempt foundations".

"Operating through respectable-appearing front groups--principally the Council on Foreign Relations (CFR), the Trilateral Commission (TC), the Bilderberg Group (BG), and the Committee for Economic Development (CED)--these one-worlders have hijacked our country!" This, coupled with the UN alliance with more than 1,000 Non-Government Organizations (NGO's) promoting the UN agenda, represents incredible resources, with which to contend!

From Carter on, each President, including Obama, has filled his administration with members of the CFR and the Trilateral Commission, a group determined to create a one-world economic, and security system. It's like purposely installing traitors, whose main ambition is to overthrow the government, whose Constitution they took an oath to faithfully serve. And, we, as a nation are irresponsible and foolish enough to vote for the "Benedict Arnolds"! As has been fittingly said, we unfortunately often get what we deserve! Or, a majority of Americans can irresponsibly fail to vote for the right candidates for office, leading to bad consequences for the country.

"Americans today (written by Jasper in 2001) can defeat the UN would-be world order without a clash of arms, and he recommends an educational

approach. Building sufficient knowledge in time will require organization under extremely tough, responsible, and knowledgeable leadership". But, as for the general citizenry, too many Americans are "low information voters", complacent and ignorant of the conspiracy that has gone on for decades trying to transform our country from the "the greatest nation on earth" to just another oppressed, subjugated, socialist, failed society!

Quoting again from Jasper's book, "Only the The John Birch Society has a track record, of educating their fellow citizens concerning the dangers of the UN. Their work has been largely responsible for the disfavor that befell the UN for so many years." Yet, most Americans don't even know what the organization is, let alone, what their critically important message is!

It is, indeed, a sad commentary that more freedom loving Americans, led by capable patriotic persons in positions of power and influence, haven't been organized in protest against the surreptitious, subversive agenda of the one-world movement, by thwarting and destroying it before its conspiratorial elitists took the country to the dangerous level that it is now at! It should be obvious by their concerted actions, that these international wheelers and dealers will not rest, or fail to use whatever means it takes, until they have the "masses" under their control!

How many well known "movers and shakers", capitalizing on undeserved "esteem" for their accomplishments, status, etc., have by their ill-conceived, presumptuous, world-changing actions committed the "high crimes and misdemeanors" that presidents can, and should be impeached for--including the present one! In fact, they have so misused, and abused their rights, undermining the country's best interests, by sowing the seeds of its virtual destruction, that they are not worthy of citizenship--but, ought to have been booted out of their traitorous positions of power, or somehow neutralized, long ago!

Oh, I forgot, if it required legal action, they control the courts too, as long as we let them! The whole thing is not irreversible, but the long delayed effort to deal with the "rotters", as the English call them, is admittedly a prodigious, nearly

indomitable task to accomplish--more difficult than our first revolution, but it can and must be done before all reasonable hope is lost!

What bothers me about these people, in addition to the damage they have done by their conspiratorial confederacy, is that they parade around as if they are eminent, good Americans, or world known dignitaries! People write glowing things about them, invite them on TV and radio shows, and hold parties and commemorative events for them, when they ought to be made to "walk the plank" for mutiny! And, no I am not being facetious!

Thinking of the vast number of professional people involved in the news, think tanks, talk shows, book writing, etc., **why is it that there is so little exposure of the true subversive actions of at least the worst of the dissemblers, and destroyers in our society?** I can't believe that they can escape the thorough examination and research that goes on for some people, that are carefully vetted.

All that the program staff people (bird dogs, and bloodhounds) would have to do is pay attention to the things on the internet, and check out whatever is reported as negative or questionable about them, no matter who is involved, and announce their findings so that the American people, and the world can learn the real truth of what is going on behind the scenes! So, it isn't that they can't do it, but that they lack principles and courage, and all too often are intimidated by fear of losing their jobs!

Instead, almost all of the media talking heads, sound like a bunch of parrots, labelling anyone who raises the subject of one-worlders, as "conspiracy theorists", which is nothing more than a diversionary tactic to avoid their responsibility to honestly and objectively deal with probably the most critically vital threat the nation, and the world has ever seen, making the media a major contributing factor in what can rightly be called "The Great American Sellout".

If it isn't some kind of strange, imposed mind control dysfunctionality, it is a shameful, even traitorous disservice to the American people--who right or wrong depend on them, at least in general as watchdogs for any possible harm and

danger to their lives!

This may sound blunt, or hypercritical, even disrespectful to a former president, but it is essentially true and destructive to our country, that George H.W. Bush is a socialist ideologue, along with most of the CFR and TC members! He, in fact, declared it to the world in the forum of a national speech in Jan. 1991. I doubt if what I said would even offend him, because of the depth of deception he succumbed to, buying into the vain, if not virtually inhumane, governmental philosophy that has failed to be a social, or economic success anywhere in the world that it has been forced upon people.

Why, then would an accomplished, prominent person, with responsibility to help the nation he represents and "serves", ever opt for a system of government that demonstrably and incontrovertibly subjects his fellow citizens to a definite loss of liberty, and privileges, and options that does nothing but reduce them to a state of restricted living, that equates to nothing better than forced servitude!

The answer is, sadly, quite simple and telling! Those who use elitist cabalistic power and authority, are really **only serving themselves** through greed and corruption, and lack of compassion for the multitudes they want to control. A prime example of "man's inhumanity to man" is right next door to us in Fidel Castro, the Cuban dictator. Quoting from a profile that I had written on him, "Though a confirmed communist (which the country should have seen as a glaring danger sign), he used the ruse of a return to democracy per Cuba's 1940 Constitution."

"But, the Cubans couldn't see through his duplicity any more than most Americans could see the red flags in ignoring the very suspicious involvements, and relationships of Obama (even after his first "monarchial" term. Duh!). After the revolution, Castro instituted a communist government, with corresponding restrictions and conditions--contrary to his campaign lies." But, where are our watchdogs, or what are they doing to protect us, after decades of covert manipulations by **the one-worlders, who have maneuvered themselves into subversive positions of power?**

It should be readily apparent to many of our leaders, even patriotic whistleblowers, so what except personal and professional fear is holding the world watchers, and media observers back? Why should the schemers and perpetrators go unscathed, who are trying to scuttle the "Ship of State"? They ought to be ashamed to sing the national anthem, or even look patriotic, honorable citizens in the eye! Oh, I know, in their deluded thinking, they believe they are trying to make a better, and safer world. But, don't think for a minute that their motivation is not more self-serving, than altruistic!

The whole scheme is ridiculously over-simplistic. Its advocates act like they are being led around like sheep; as if something has taken over their minds--and they don't know it, or can't resist it! It is bad enough, and pervasive enough in the elitist psyche or intellect, to call it **a mental crisis!** Why are there not more than a few voices against the conspiratorial, ever-dangerous threat to our national sovereign freedom, security, and prosperity? That is, our whole country as we have known , and loved it?

**A socialist, central government defies, and denies natural human rights, that no man should have control over another, or the right to negatively affect his life, in any way!** Man's inhumanity to man, cloaked in a false idealistic philosophy, is no less tyrannical than basic forced slavery, robbing man of the dignity and right to live freely and independently--and not as a second-class citizen!

The first law of life, is self-preservation, or security, and the means to protect and accomplish it, should never be surrendered, or even negotiated! No government imposed restriction against that instinctive, ordained right should be submissively tolerated, but held as a freedom to be fought for, to the death if necessary!

The conspirators haven't been able so far to make their big engulfing move, but their resolve and dedication has not lessened. And, even though the ideology goes back centuries, they have been continually behind the scenes fortifying and reinforcing the structure of their diabolical plans!

Picture, if you will, the finished product in the form of a giant octopus lurking

unseen above the earth, with its tentacles poised for a global attack--just waiting for the optimum moment, when everything is in place for the cataclysmic event to be progressively launched--from which the world would probably never recover! No science fiction plot of an overpowering alien attack could match it for realistic, intense drama, and finality!

Of life's greatest responsibilities, are not vigilance, and effective preventative action the keys, or the cost of maintaining freedom? If citizens won't pay the comparatively lower price of preservation, it is pretty sure they won't sacrifice enough to cover the extremely higher cost of recovery and restoration! In other words, practically speaking, they will have reached the point of no return!

Consider the complex infrastructure of our national way of life. The massive consumption of electricity, which we take for granted depends upon the production and distribution of a giant grid system (that has been reported to be only about 50% efficient, as it is), which very likely could be compromised and interrupted, or destroyed to the extent of a national crisis! How long could the country survive without it?

Or, the collective supply and distribution of safe drinking water, and not to overlook the essential home and industrial dependence on available water for all the purposes involved. Could not this either be sabotaged, or otherwise become contaminated by some natural, phenomenal occurrence?

Think of the food supply, and medicinal products which mainly are delivered to stores by an amazingly efficient "pipeline" of ships, planes, and never ending convoys of literally many thousands of trucks per day. How can we be sure that the vital infrastructure of highways and rails would always remain open and usable to the critical extent that is continually required for not only the nation's welfare, but our continued survival, or existence? And that whole distribution system is dependent on some kind of fuel--the lifeblood of the entire fleet and all other vehicles, to be able to operate!

And, for another very possible calamity, there is no end to the devastating effect that a major breakdown of the nation's electronic communication and

computer networks could cause! A serious loss of that technology would wreak destruction and havoc, that could be practically beyond full repair and restoration of service.

The increasing worldwide threat of terrorism, makes the foregoing catastrophic occurrences more than simply conceivable, but probable, unless there is a better collaborative international effort made to prevent, or defeat the evil Islamic ideological/military campaign, or the world may never be the same again! Surely, it is not extremist to say today, that the security, and hope of peace and prosperity for the people of the world, who haven't lost it already, is hanging in the balance!

It may be the lesser of two evils, but if terrorism doesn't eventually subdue the earth by its diabolical ideology, and barbaric conquests, the encroaching one-world government conspiracy will effectively transform every sovereign, free nation into interdependent, relatively powerless subordinate member nations, forever subject to, and enslaved by a tyrannical hierarchy, which will impose and enforce UN Charter unlimited authority at will, to keep the world under its despotic control!

I wonder if, then, the foolish, cowering, sycophantic masses will still praise and idolize the traitorous elitists who sold them out, in order to establish controlling power over nearly every aspect of their lives! The worst part of that scarily realistic scenario, is that it will happen because its victims would not fight and die, if necessary, to resist the comparative minority number of subversive conspirators before they get organized and mobilized to the extent that they control all the levers of power. And, the one dominant nationalistic organization that controls, or influences the global movement more than anything, is Zionism!

Zionism is a nonreligious Jewish movement, formed prematurely in the late 1800's (before God's appointed time, according to prophecy, subject to his direction) to free European Jews from centuries of persecution, expulsions, etc., during their long period of dispersion. The Zionist movement advocated creating a Jewish national state in Jerusalem. Orthodox, Judaist Jews wanted to keep the historic, natural merged relationship of the two races, intact.

Zionist Jews are openly racist, and terrorists, running roughshod over the mainly peaceful Palestinian Arabs, by dispossessing them of their homes and land,

even denying them equal human rights to the necessities of life--food, water, and other utilities, and safety and medical facilities and services. Prime Minister Netanyahu is not a traditional Jew or Judaist, but a Zionist, and key leader of brutal attacks against Palestinian Arabs.

Can we not see how the Zionists, driven by nationalism and the greed of materialism, with their wicked subjugation of the Palestinian Arabs are the real inhuman antagonists, along with the Islamic terrorists, in a grievous manifestation of human depravity? A good reference on this subject is the Palestine Information Project's report, "Palestine: An Introduction to History & Issues", produced by the Palestine Solidarity Committee--Seattle, which publication I have quoted, or referred to in this commentary. Also, Neturei Karta International represents the orthodox Jews, and as such is strongly opposed to the Zionist movement. The former being the basically faithful religious element, and the latter is non-religious, motivated by self-serving ruthless nationalistic and materialistic ambitions to possess worldwide wealth and power, which they have largely accomplished!

As for the UN, what were all our eloquent speech makers doing, besides engaging in the rhetoric of national and personal interests, during this long rise to power of the globalists, whose subversive actions are guaranteed to radically downgrade the quality of life that loyal Americans fought and died for--and from which there will probably never be a recovery? Were there not honorable statesmen, though a minority, who could have worked against, and helped to prevent the anti-national conspirators from developing their surreptitious movement to the extent of an increasingly dangerous world takeover force?

I am going to say something as an explanation of why intelligent, supposedly principled national leaders, cannot see the trap, they helped set--intentionally or not--in the radical collectivist rules, and regulations that the UN Charter has established to replace our sovereign, free nation Constitution. The contrivers even have the gall to call their iron-handed laws, "principles". Except for kingdoms, which can be good or bad, there are democracies or republics like America; the latter being established under limit-setting Constitutional law.

The spread of socialism, and communism has robbed untold millions of people of their individual God-given, and documentally ordained rights to pursue their own choices of life, with minimal necessary societal laws and regulations, that are subject to the majority will of the people, not with assumed, or usurped authority

of elected leaders and representatives.

There is a phenomenon in life involving two spheres of knowledge, or operating centers in man, one of which will help explain why natural man does not have a completely free will to always do, or think what he wants to. The crux of this seeming mystery, is why or how an otherwise normal intelligent, rational person can ignore the only logical understanding, and course of action for things he is responsible for in life!

Since the fall of man resulting from Adam's commission of original sin, which all men organically inherit, they lost the capacity that Adam had to understand spiritual things (of God, and his supernatural works of creation). It was part of God's forewarned punishment for disobeying his command not to partake of the forbidden fruit of the tree of the knowledge of good and evil!

For, in so doing, man took upon himself independent responsibility for every thought and act of his life--without spiritual wisdom, and the guidance, and blessings, and special provisions of God as a necessary part of fulfilling his purpose of being a "lord" of the earth, as God had designated him!

The bible, in 1 Cor. 2:14, says "The natural (unspiritual) man receiveth (or understandeth) not the things of the Spirit of God; for they are foolishness (meaningless) unto him; neither can he know them, because they are spiritually discerned." And, it may be added, that even Christians who do not adequately study the scriptures will not correctly understand some of the harder things required to be learned, to their detriment!

Quoting from my website article (slightly reworded), "The Powers That Be, or The Controlling Forces of Life": ..... "anyone that can deny the logic of supernatural, divine creation, and become deluded into believing the imaginary concept, or fantasy of natural, happenstance self-performing evolution out of nothing, must be under a mental influence, which he cannot resist, and at times prevents him from thinking rationally and logically"!

I know, having been given spiritual understanding, that only Christians can have, that the identity of that overpowering force, as revealed in scripture, is Satan, the temporary ruler of the present world over the lives of unregenerate mankind, who holds them "captive, at his will".

There are, then, in life two supernatural beings, or entities that have either (1)

absolute, unlimited power over us, who is the eternal God, creator and administrator of the universe, or (2) temporary limited, controlling access to the lives of all natural, unspiritual people in the world, that being Satan, designated as "the god of this world", 2 Cor. 4:4, and "prince of the power of the air", Eph. 2:12.

Satan, who had once been a highly exalted angel in God's heavenly hierarchy, rebelled against God, and was cast out of heaven, and assigned by God to rule over the fallen, unredeemed race, under the domain of the earthly judgment of the "law of sin and death". Satan can be in Christians' lives too, if they give him access, but they have the power (indwelling Spirit of God) to resist him, when they exercise defensive action against him (by using the applicable word of God), i.e., James 4:7, which instructs believers to "Submit yourselves, therefore to God, resist the devil, and he will flee from you".

Summarizing this subject, then, it is the reason that man may act contrary to logic, and other natural disposition. And, however demeaning it is to think about it in the following way, all those who are not actual Christians, are subject to Satan's influence! That is, he can act in their lives, whenever he chooses to, if God doesn't intervene for some reason, as in general providence, or some specific purpose, for examples.

Yet, there is an interesting limit to how much Satan can affect unspiritual man's thinking, especially as it relates to man's observation and judgment of the answers to the origin or cause of life, and elements of nature or the physical world. God says in his word, in effect, that man is without excuse for not seeing in nature, both his divine reality, and his supernatural works of creation, especially the wonders of human and animal life.

Even though man's imagination has gone wild in his theory of natural evolution, the basic facts of God's universal works of creation, are understandable in nature, alone! Satan did not, and can not cause man to think differently than his natural ability would lead him to comprehend that one fundamental reality of the supernatural origin of life, and all other acts of creation!

There is a very revealing passage of scripture, Rom. 1:19-25, which is the basis of the preceding commentary on what man is responsible to know about God, and his creation. It states, ".....that which may be known of God is manifest in them (ungodly and unrighteous men); for God hath showed it unto them (in nature)".

"For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal Godhead (deity), so that they are without excuse." (As C. I. Scofield, the Reference Study Bible editor said, "The universe is a revelation of the power and deity of God").

"Because that, when they knew God (through nature), they glorified him not as God, neither were thankful; but became vain in their imaginations (reasonings), and their foolish heart was darkened.

"Professing themselves to be wise , they became fools,

"Who changed the truth of God into a lie and served and worshipped the creature (things of nature) more than the Creator, which (who) is blessed forever. Amen."

Therefore any non-Christian that doesn't hold to the foregoing account of God and his creation, is playing into Satan's hands, who leads him into a fantasy world of the idea of natural evolution--which is about as scientific as the most outlandish fairy tale imaginable.

But, for the creationist belief, nothing more accurately describes its truth, than the phrase "intelligent design", which the evolutionists try to discredit with the strawman argument that those words are merely a product of the Christian religion, and therefore only relate to the abstract tenets of faith. But, they would say, "certainly" they are not scientifically relevant to the subject of the origin of life, and the material universe, and the laws of nature.

Yet, nothing better, and more succinctly defines the proof of supernatural creation than those two words, "intelligent design". They cannot be logically argued against, for anything else is imaginary, or impossible theory. Truth, when fully examined, and clearly expressed, will always trump error or fiction, which cannot validate its claims!

And, by the way, one doesn't have to personally believe the scripturally revealed truth of the mysteries of life, to at least allow the premise that the observation, or posit of creation by intelligent design is a conceivable reality--especially if one can believe the scientifically impossible fantasy of natural evolution!

Back to the UN Charter subject, the one-worlders' illogical, foolhardy

conspiracy rationale, plus their affinity or attachment to the occultish elements of secret societies, and brotherhoods of "death" oaths of allegiance, etc., explains some of the Satanic alliance, and their natural intelligence being overpowered by his supernatural intervention.

There is no logical, or rational explanation as to why the obvious red flags of constraining socialistic terms and restrictions of the UN Charter, are not seen as a sellout of democracy, and the sovereign independence, and superiority of the American way of life, nationally and personally in every aspect!

As I said somewhere, it is like a farmer giving away a successful, productive farm, to become a sharecropper, because that is what the radically reduced way of life will be like! Or, why would any sane person exchange any fulfilling life, or livelihood for the slavery conditions of tyranny; no longer being independent, and free to pursue life by one's own choosing of options and possibilities? If you ever thought that most of the elitist leaders, and prominent people, who are providing for their own desirable way of life, care much at all about the average Joe, this traitorous action ought to assure you that they don't!

Obama's ideology, of course, is closely related to the NWO doctrine; he being obsessed with social "justice" (i.e., equality of wealth) by redistribution (including confiscation, which has already been partly executed), welfare expansion, radical diminution, or elimination of Christian rights, LGBT special provisions, higher taxation (esp. corporate), increased environmental, and business regulations and fees, etc.

By all of which, Obama causes intentional counter-productive economic, and discriminatory cultural results. Why couldn't enough of us have seen this coming? There were telltale signs all over the place in his subversive background. So, who let the weasel in the henhouse? Unfortunately, a majority of irresponsible Americans. I know you may think I am being disrespectful to the president. But, respect must be earned, to be deserved! If he doesn't respect the office, and he clearly does not, why should anyone respect him? It would be disingenuous. It can't automatically come with the office! Civility, and protocol, yes, but not true respect!

Contempt is very much in order, when the office is abused by the wrong use of position and power! In fact, impeachment action is what ought to have been taken, in his first term, in light of the long line of "crimes and misdemeanors" that

Obama has committed! No president ever met the criteria of impeachable offenses more than he has; not even close!

Aside from the culpability of those offenses, the Declaration of Independence says that a president may be impeached even for a majority disapproval of his conduct, or technically, dissatisfaction with him, alone. The document notes that such latter action should not be taken hastily, without having endured the problem for a reasonable length of time!

However, that period of long suffering should have ended in Obama's first term of office! And, there is still time to throw the scoundrel out, if the Senate had the will to meet their responsibility, and start the process for such overdue action! It is not optional, it is required, as probably the most important factor to maintain sound government!

Because, it is certainly true that nothing has negatively affected the wellbeing of the nation more than Obama's unconstitutional administration of his office, to further his subversive mission to undermine our traditional free, sovereign republic, and turn it into just another interdependent socialist nation--subjugated to the despotic rule established by the long conspired connivances of the traitorous purveyors of the UN Charter, one-world government!

I don't even like to call them fellow citizens, but turncoats who deserve the kind of government that they are so enamored with, but those of us who have our heads on straight ought not to have to be dragged down, and dehumanized because of their power-driven manipulation of unique, societal institutions which made America an exceptional model of economic and personal prosperity, along with many social freedoms and opportunities.

You may note that I said "many", because there are always greedy opportunists, or power brokers that will take over what they want, or can get away with! An example being how that sports teams and the media have exploited, and hi-jacked that industry, turning it into an empire that through exorbitant advertising revenue sharing, and overpriced tickets and concessions, can pay astronomical ridiculous salaries to players, managers, executives, and staffs!

And that is just one combined industry, and the same manipulating, power plays can be seen throughout the nation--all trying to grab a bigger piece of the pie, so they can keep getting financially fatter! And when they satisfy that greed,

they go after power in their industry and others, then political power--up the line to eventually the international arena, where they and the other elitists scheme and plot how to change the world to further secure their absolute control of it!

A simple argument, with abounding evidence of its truth is, why would anyone exchange something that works far better than any known alternative, for something that has historically proven to be a failed experiment or venture, every time it has been tried?

The only ones that actually benefit from a one-world government and society, is the elitist power structure that created and controls it, who only have to worry about their associates mutual "integrity", of playing by the established rules. That intriguing thought should tend to keep many of them awake at night! May the rest of us hope the conspiracy never finally succeeds, but it is probably nearly ready to be launched onto the world! The "devil made them do it", fits the crime more than anything else conceivable. There is no other logical explanation for such a brainwashed act of infidelity, by so many, that it is otherwise mind-boggling to try to make any sense out of it!

If you were to ask Bush 41, and any of the long list of well known names that support and promote the one-world government movement (conspiracy), if they are socialists--most of them would probably say no, but if they think like a socialist, act like a socialist, and vote for centralized governmental control like a socialist, its pretty safe to say they are one!

It is very disappointing, and difficult to believe that so many generally respected figures could conscientiously be part of such an undermining conspiracy to sell out their own native homeland, and buy into the cockeyed utopian concept of a New World Order, which is doomed to fail even before it may start!

Along with the fitting socialist label, they are traitorous Americans, who ought to be ashamed that the most defining act of their legacies will be that they betrayed and sold out Americans "birthrights" (for a comparative "mess of pottage"), per Gen. 25:29-34--and will have caused the demise and destruction of "the last great sovereign nation" in the world!

If they ever make a movie of the tragedy, it should be called the "Death of Democracy", or "Final Freedom", or the "Obituary of Opportunity", and the cast has to be characterized by the aforementioned "Judases", dupes of the devil, those

with the nation's "blood on their hands".

When I referred to the power of the devil, to influence and control people's minds, the main subject of this commentary magnifies that evil supernatural power more than anything I have ever seen. That is, (1) the mass indoctrination of so many key leaders, statesmen, educators, bankers, industrialists, media moguls, and other people with positions of wealth and power--with the notoriously failed philosophy of socialism, and (2) the practically universal news and media silence on the whole one-world conspiracy movement!

Following is a partial list of the notable dignitaries, in and out of government who are or were members of the Council of Foreign Relations, or the Trilateral Commission, or both:

George H.W. Bush, Bill Clinton, Sandra Day O'Connor, Dick Cheney, Les Aspin, Colin Powell, Robert Gates, Brent Scowcroft, Jesse Jackson, Mario Cuomo, Dan Rather, Tom Brokaw, David Brinkley, John Chancellor, Marvin Kalb, Diane Sawyer, Barbara Walters, Cyrus Vance, Paul Volker, Henry Kissinger, George Schultz, Alan Greenspan, Madeleine Albright, Roger Altman, Bruce Babbitt, Howard Baker, Samuel Berger, Elaine Chao, Dianne Feinstein, Ruth Bader Ginsburg, Chuck Hagel, Gary Hart, John McCain, George Mitchell, Bill Moyers, Jay Rockefeller, Donna Shalala, Strobe Talbot, Fred Thompson, Robert Zoellick, Richard Nixon, Hubert Humphrey, George McGovern, Gerald Ford, Jimmy Carter, John Anderson, Walter Mondale, Michael Dukakis, Al Gore, John Kerry.

What about some "unconverted" prominent figures in society, plus talk show heads, and news channels on TV and radio, and print media, etc.? Why is anyone who really cares enough, not preoccupied with the impending crisis that this extensive global development poses, which will devastatingly affect the remaining distinguishing values of the free world--national sovereignty and security, freedoms, economics, industries, natural rights and livelihoods, plus social liberties and opportunities, etc.?

With what little success the UN has had so far in trying to manage the planet's problems and demands, total world domination will only produce more bumbling mismanagement (from the "Tower of Babble"), developing into out-of-control, virtual chaos, and human outrage and hostility! Revolution would seem inevitable, and if it doesn't happen, those who would not fight to conquer the inhumane tyranny they would have been subjected to, don't deserve the natural rights and

freedoms that they were created to enjoy on this earth!

Can the majority of mankind be that self-destructive? Time will tell, but empires, and nations have fallen, and stayed defeated for the lack of will to overcome and survive the abusive control of oppressive regimes, and other imposed cruel, restrictive circumstances. Anyone that compromises, and won't fight for his freedom, and other natural rights, capitulating to the demands of anyone that would deprive him of his God-given entitlements, surrenders and denies himself the dignity of personal independence, and self-determination!

He is, however sympathetically we may look at it, nonetheless, a coward! "Live free, or die", the New Hampshire state motto, is the ultimate creed that one could live by--but, I would venture to say in today's unprincipled culture, that a far less percentage of the nation's citizens would make and keep that vow, than of those who lived when that declaration was made!

But that ultimate principle is still valid, and probably more tested than at any time in history! Untold thousands of military men and women have proven their dedication to it, but how many of the rest of us would sacrifice whatever that motto might ask of us? Well, unless we sufficiently organize and fight against the "New" World Order fast encroaching upon us, our national and personal freedom may be a thing of the past, never to be recovered!

The language of the United Nations Charter, and other associated documents is so meticulous and specific, that they detail an almost inhumane restricted life, totally under the control of a central government, with virtually unlimited power over every inhabitant on earth!

The urgency of the situation cannot be overstated, and ought to be the main subject of every media outlet, to impress upon every citizen, the severity of the developing crisis that faces the world today! But it isn't! So. where are the voices, and the trumpets that should be warning us of an impending political, and sociological doom? The fact of this centuries-old conspiracy has been known, or knowable, from the beginning, so that there is no excuse for the relative silence that has existed on the subject.

One of the few exceptions to the mysterious lack of congressional, and media attention to this brewing global takeover, is the excellent coverage by the UN Expert William F. Jasper, as previously noted in this commentary. Anyone could

become well educated on the whole conspiracy, by reading his warnings, as cited.

I mentioned, and explained the reality of the phenomenon of mind control, and its various possible causes, including psychological experimentation projects, with an irresistible Satanic connection. What else could be the reason for the worldwide lack of awareness, and any significant dealing with the revolutionary negative effect that such a comprehensive world-changing plan can have? It seems like not enough can, or will ever be done to stop the devastation that this massive conspiracy will cause!

But somebody, many somebodies ought to be trying to derail the runaway freight train from hell, or the devil's domain here, while there is at least hope of thwarting the megalomaniacs plot, or horror story that is unfolding more every day! The sad thing is, that very few people are reading the "book" (the available reporting on the subject that exists), and therefore are not informed that the conspiracy has the makings of a story, that could well be called "Back to Tyranny".

We fought and won liberty from British tyranny, and now the stage is set for surrender to NWO despotism, and we don't have the dedicated military force in place to resist it! So, now we are about to lose the freedom that our loyal ancestors risked their lives for, and that many died to secure for us!

Think of the potential good that a presidential candidate could do, if he was sufficiently educated in the socialist doctrine of the UN Charter, and related documents: The Declaration of Human Rights, Agenda 21 and various other propaganda produced by the NWO conspirators--and would use it as his major platform to inform the American public of the subversive, sovereignty and freedom threatening movement that is an impending catastrophe, that could be caused by the UN elitist rulers at any time they choose to launch their major coup d'etat.

All the other political issues, and partisan conflicts, etc., are side shows of little importance compared to the ominous NWO conspiracy that seeks to relegate our nation to the subordinate status of one more country dependent upon the administration and control of a central socialist world government, with unquestionable autonomous, unlimited power and authority!

The traitorous, elite brotherhood could have legally executed their planned takeover ever since 1945, when the United States Senate agreed to, and signed the

treaty that authorized the U. N. to assume complete administration and control of our national government, and its citizens!

And in all that time, only a relatively few loyal people in governmental, news and literary circles have had the conviction and courage to speak out against the growing threat of globalism, the one-world central government (utopian idiocy) that would permanently end American sovereignty, self-government, security, a prosperous capitalist economy, and national and personal freedom, and practically everything that distinguishes a free republic society, from socialism (which is inherently repressive), or any other form of statist restriction, and control!

As Jasper noted, the John Birch Society exerted pressure against the conspiracy for many years, that retarded their progress--but no other comparable organization exists in the media, or other venues today. Yet, it is the kind of activist counteraction to dangerous national threats, that is more needed than ever! But, sadly, it doesn't look like there are enough constitutionally loyal leaders that would resist and help prevent its consummation!

Congress doesn't even have the resolve, or courage to bring impeachment charges against Obama, the most oath-breaking, perpetrator of "crimes and misdemeanors", of all the Presidents we have had; maybe even combined!

The world-changing political event that looms larger than ever may go down as the most difficult to understand "mystery in history", as to how it could really happen in a country like ours. I hope something can still prevent it, but unless God might have the will to intervene (for which, under the earth's judgment conditions, he would have no compulsion, or good reason), the prospect of defeating the elitist, power brokers from hijacking our country, is very slim, and discouraging for those who care, and are victims of the betrayal by the CFR and related subversive groups--but who lack the concerted leadership to organize and mobilize against them!

Will we succumb to the world's biggest "paper tiger", through ignorance and lack of will to maintain and preserve our precious heritage? If so, we don't deserve what God gave us through the brave, dedicated forebears that paved the way for us to live in freedom, and enjoy the development of the most accomplished and exceptional nation in the history of the world!

A natural birthright of the quality and value of ours, is to be lived for, and if

necessary died for, but never to be given away by irresponsible representatives, and other elitist leaders, who only seek their own power and advantage, or who are at best, deluded with a utopian one-world concept!

As I have previously commented, there are disappointingly, relatively few critics of the UN Charter, one-world government--and unfortunately there is often a bias, especially Zionist that limits some commentators from fully exposing it as a key driving force of the conspiracy! Probably the best example is Alex Jones. He has, for years, been more consistently engaged in opposition to the NWO movement than probably any other media voice.

But, he is conspicuously defensive of the Zionist Jews, denying their major involvement (as one-world Insiders) in the development of the New World Order socialist plan to establish a totalitarian central government! Jones's Zionist affinity stems from his wife's Jewish family history. How, or why, does an otherwise consistently thorough and consistent objector to a centuries-old world-changing plot to subjugate and enslave sovereign, independent, free nations, fail to deal with the most powerful element of the conspiracy?

One of the best truisms I have ever heard, is what Ann Coulter said on the subject of prejudice. In her book, "Mugged", she poignantly remarked that, "Racial filters paralyze logical thinking". I used the phrase, in referring to a political pundit, (not by name), in whom the black racial bias is so deeply-rooted and ingrained, that one can see the effect of broaching an opinion, or fact, contrary to his obsession on the subject!

The race reference typically triggers a "paralytic mental block", or "partisan reflex" making the person(s) subjective, defensive, and usually argumentative! In Alex Jones's case, he tiptoes around the subject, making minor concessions of Zionist faults or mistakes, as with any race, but not open to discuss or consider charges of their actual key complicity in conspiratorial, subversive actions!

Yet, it isn't as if the allegations relate to clandestine, or secret plotting that can't be verified, because there are documents, and open records that attest to the details of the development and progress of the conspiracy movement throughout its history! There are many public comments by various elite leaders, and supporters boasting of accomplishments, and promises of fulfillment of the socialist global transformation plans, which will adversely affect every aspect of

human life and activity, by oppressive regulation and control!

The UN expert William F. Jasper, said (in 2001) that it was (is?) still possible to defeat the would-be world order, recommending an educational approach --but it will require "organization under extremely tough, responsible, and knowledgeable leadership", like the work of the John Birch Society, which was an effective deterrent to UN development progress for several decades, or more.

But, sadly, I don't see the evidence of the "will" today, but rather, apathy to do anything about it, as serious as the impending cataclysmic event that it would be! We can't win a battle, against a calculating, threatening enemy, that we don't even recognize to be one, but that is a scheming, traitorous class of power-wielding, egomaniacal elitists, who as Deanna Spingola said, "have absconded with the reins of government". Hopefully, there could be time, as Jasper said, with the right leadership to encourage enough people to want to save our country from the disaster that looms before it, larger than ever!

Are you an uncommitted, uninvolved descendant of one of those courageous, loyal citizens that fought, and maybe died for your freedom? Is the spirit dead that took on the mighty British Empire, and emerged victorious? How many of us could utter the famous words of Patrick Henry, "Give me liberty, or give me death", or as previously mentioned, the New Hampshire state motto, "Live free or die"?

Life under the proposed New World Order will never be anything but limitedly free, at best! And, it won't take long before people will realize that; too late! Anything imposed on man, that restrains his complete freedom is a form of a prisoner's shackle. Anyone that thinks he won't lose his comfort zones, and chafe, and struggle under the extensive restrictions and demands that would be forthcoming under the UN dictatorial regime, is as the saying goes, "in for a rude awakening", being a poor student of the realities of world history, by which knowledge, he might have learned the lesson of the cost of freedom, and his personal responsibility to fight against those, who externally or internally, would undermine, or threaten to attack it!

But, after the fact, the cost of freedom would probably be insurmountable, even by insurrection--which, judging by today's apathy and complacency would never really occur! Most countries overtaken by tyrannical governments do not revolt, or otherwise recover their independence, or previous form of government.

Cases in point, Cuba, and various Soviet socialist republics (until more recently, in their historic struggles).

If, which is virtually on the verge of happening, the UN gets entrenched, and accelerates its comprehensive plan to affect every aspect of life as we know it, we, without an extensive counter-plan and effort to resist, and overcome the intended takeover, would be at a tremendous disadvantage to try to maintain or recover our independent historical sovereignty and freedom!

And, the great "mystery" remains (as alluded to in opinions, previously given herein), as to why so many notable people have fallen for the traitorous and ridiculously futile global government plan, and why there is so little patriotic public protest against it! The reality of its doomed prospects, won't take long to set in, and multiply, and move the world from ignorance and cowardly acquiescence to protest, and pandemonium, and chaos!

Hopefully, the fear of that highly possible devastating worldwide result has been realized by enough of the ruling heads, to have delayed moving their plan to the precipice, or reaching critical mass, and the point of no return! Better to have a nightmare that would end in the morning, than to create one that can't be stopped, or controlled!

Or, writing the script for a radically changed world, and forcing the inhabitants to play roles living out their own demise, has to be a recipe for colossal failure and destruction! How unrealistic and foolish to think otherwise. And with such an almost inevitable outcome, I wouldn't feel very safe as one of the perpetrators, that it wouldn't be their undoing, as well!

Not the kind of masters of their own fate, that they planned, but having an element of poetic justice! Could this possible scenario be thought provoking enough to loosen , or let go of the reins--or will they continue on the crash course they've chosen?
