9/11 WTC False Flag Tragedy
An Indisputable Act of Conspiracy

How does a supposedly reputable lawyer, like Alan Dershowitz, recommend special counsel, like the 9/11 Commission to lead the ongoing FBI and DOJ bureaucratic investigations, justify blatantly ignoring undeniable facts, and accepting intentional false "findings" for the planned, politically driven event of the World Trade Center tragic assault?

Especially when the government account of the catastrophe completely defies the only rational explanation of the evidence of a criminal act perpetrated by our own government! No one else had the resources, wherewithal, and access to put in place, and carry out the meticulously arranged, controlled demolition plan!

It is nothing short of absurd to think that Osama Bin Laden, simply by crashing aluminum planes into a fortress of a steel building could do anything more than superficial damage to the structures! And even with the attached hole making explosives, nothing more than localized floor fires could result from the attack.

As analysis overwhelmingly proves, the plot was another "false flag" occurrence, staged and executed by our government for the furtherance of the one-world domination conspiracy, being carried out by an international, megalomaniacal elitist cabal for

over two centuries. In cold, hard language, the administration under G. W. Bush, and Congress intentionally sacrificed the lives of our armed forces as pawns, and huge amounts of capital to create a war having no defensive justification for the security of the United States!

What deceitful ploy did they use for going to war against Afghanistan? "False" flag propaganda, convincing our military personnel, and most of our citizens that it was essential for national defense. The 9/11 scheme was just another example of manufactured provocations for declaring war, as in World War I and World War II. Neither decision was necessary for protection of our country!

In fact, the only war that we have been in that was for a legitimate defensive purpose was the Revolutionary War against England. All the other wars have involved war-making international politics, which true historical accounts verify and explain.

As for false beliefs, the **fairy tale of natural evolution** is the all-time most inane, illogical and impossible theory of universal life and material origins, when the unique details of nature, and life species themselves disclose their intricate design and construction by an infinitely powerful creator, and administrator of the universe, who is God by name! Then, there is, in our time, a major catastrophe and tragedy that ranks in order with the worst explanations and accounts of causes and effects.

I am, of course, referring to the concocted rationale put forth

by the government, that the 9/11 World Trade Center disaster was the result of Islamic terrorists hijacking, and flying two large planes into the twin WTC towers, and another plane into the Pentagon. along with a fourth aircraft which was caused to crash by heroic passengers on land in Pennsylvania!

Our "trustworthy" government leaders, informed us that the tragedy was caused by Osama Bin Laden, who had 19 Al Qaeda men trained, equipped, and directed to carry out the mission of destruction. All of which was "corroborated" by the 9/11 investigatory Commission, whose report is a classic example of our government's systemic practice of fake news and propaganda! They have been playing fast and loose with the truth long before the internet made sleaze "fashionable"!

And just as the practitioners of the hoax are guilty of the cruel, inhumane loss of nearly 3,000 lives in the New York incident, so too are many ill-informed, gullible people, who agree with the Commission, inexcusable for their failure to identify the obvious government plot!

The purpose of the diabolical scheme was to establish another US/UN/NWO international base of operation, to facilitate the eventual institution of the "one-world government organization" plan to ultimately dominate and control the earth, by an elitist despotic hierarchy.

Every time I think of someone as an assumed principled objective thinker, and a faithful citizen, It's hard to believe that he, or she would be one to capitulate to the one-worlders' self-

serving utopian goal, involving evil, nefarious actions against fellow man. But, I forget, we're talking about double-dealing lawyers, and others here!

As for the NWO elitists, they do not have enough moral character, or professional integrity to keep most of them from exploiting the greed of materialism and associated money and power, to enable them to aspire to reach the pinnacle of super wealth, and world control.

Following is a rundown of some of the 9/11 details involved in the planned destruction of the WTC buildings, which clearly invalidates the preposterous claims of the Commission, either as obvious lies to cover up the heinous government crime committed, or colossal ignorance, and dishonesty by failing to arrive at, or admit the truth of the incident.

1. Fifty of the world's leading physicists all stated that it is impossible for fire to cause the collapse of a steel frame building. In fact, no such results have ever occurred!
2. Only a pre-arranged controlled demolition plan could cause such buildings to implode and collapse.
3. WTC building 7 was not struck by a plane, and steel columns fell in 30 ft. lengths (the demolition trucks' body length).
Coincidence?
4. The columns were hauled away the next a.m., illegally removed without forensic examination, and shipped to China, to

remove evidence of the subversive high crime!

5. Outside wall concrete was pulverized, which fire could not do.

6. Columns were cut off in place with special chemical material (thermite?), which can cut through steel like a knife through butter.

7. The Towers were built to withstand 160 mph winds, and the crash of a 107 plane (not much smaller than a 767). No significant effect was found on perimeter columns, or core structure. Nothing was displaced.

8. A decision by Silverstein, the lessor, and the Fire Dept. was made during the events to pull down (demolish) WTC 7 (which had already been scheduled for removal per Urban Renewal Project).

9. The towers, per Commission false report were said to be weakened--yet photos and videos show both towers to be stable, and motionless after impacts.

10. Floors, made of strong constructed grids of steel, versus "lightweight truss" systems (reported by the government 9/11 Commission).

11. It would be virtually impossible for aluminum planes to crash through the outer walls of the towers! Cameras observed explosion flashes (gigantic fireballs) just before impact, which made holes in the buildings. Hence, there is no way the planes

could ever do that much damage, by mere impact.

12. Unanswered questions submitted by family steering committee credible witnesses, whose testimonies were ignored by the 9/11 Commission, and the mass media.

In summary, the 9/11 Commission's "findings" are a classic example of our government's systemic practice of **obfuscation**, **"fake news"**, and **propaganda**, as in the following oversimplified false quote from their Report: "The 9/11 attack was driven by Usama Bin Laden. We now know that these were carried out by various groups of Islamic extremists."

A correct account of the assault was that even though the Islamic terrorists were employed in the attack as a "false flag" subterfuge, the real cause of the incidents was the **NWO conspiratorial U. S. Government complicity**, as proven by the conclusive incriminating evidence cited, heretofore.

Being, I assume, a Zionist Jew, does Alan Dershowitz count himself as one of the elite minions who would be classified among the ruling and select class of the New World Order? Is it any different than Senate Democrats **voting party line unanimously**, against a Republican sponsored tax cut bill, that definitely benefits most citizens of either party. How is Party allegiance at any cost vs. responsibility and loyalty to the American people justified? Where is the conscience principle, and integrity in either of the two cases?

Reference for some of the various quotations, and conclusions

herein, was made to the Spingola Speaks website, which I find to be a source of well researched, credible and extensive information.

Another serious case of media malpractice, is the denial of First Amendment free speech rights regarding the New World Order movement. It is, in effect, a gag order, wherein nearly all media organizations automatically refuse to give audience to callers, or emailers who want to discuss the New World Order conspiracy. The programs dismiss the subject as a ridiculous "theory"!

This, in spite of the fact that the actual movement has been going on surreptitiously for over two centuries, and is well documented, recorded, and credibly--though rarely--broadcast and published.

So, where is the conscience, and upholding of the 1st Amendment rights of citizens' beliefs, opinions, criticisms, etc. Like most other promises, everything has its limit and price. And, now to make matters worse, Hillary Clinton has said publically, that all religious airing, and publicizing should be banned! Which, you can be sure, she would cause to happen through Executive Order, if she couldn't get it done through Congress. No real surprise there, even George W. Bush said more than once, that he wished he could be a dictator, because it would make things much easier for him.

Principles to remember about free speech: "Truth does not fear opposition, debate, or investigation". As Sir Edmund O'Brien

said to the English Parliament (in my words, but with the same meaning), that 'nothing should restrict the free exchange of ideas. Let the public decide, or judge which ones are true, or deserving of credit in the public discourse'.

Which means full and fair attention to every theory, or opinion, whether true or false--so that citizens can receive and share complete information, by public access, on any subject of life, without the threat of the imposition of penalties, or restrictions, yet allowing for certain agreed upon moral, or national security limits.
