

INSTALLATION INSTRUCTIONS FOR IMCO-NV ELECTRIC POWER STEERING PUMP

NOTE:

IT IS IMPORTANT THAT THE ELECTRIC PUMP IS INSTALLED IN A DRY AND WELL VENTILATED AREA, FRESH AIR IS IMPORTANT FOR COOLING!

THE ON/OFF SWITCH ALLOWS YOU TO TURN THE PUMP OFF WHILE STARTING THE MOTOR(S) DRIVING ON LONG STRAIGHT AWAYS OR WHEN EVER IT'S NOT NECESSARY TO RUN, THIS IS A POWER ASSIST SYSTEM WHICH MEANS YOU CAN STEER THE BOAT WITHOUT THE PUMP RUNNING IF NEEDED!
