EVERY INVESTMENT OR TRADING STRATEGY INVOLVES SOME LEVEL OF FINANCIAL RISK.

The author of this Site cannot and will not provide financial advice. The author of this Site is not, nor does he represent himself to be, a registered investment advisor, broker, or dealer. Some of the information on this site involves highly sophisticated levels of investment complexity and may not be appropriate to an average investor. Trading or investing whether on margin or otherwise carries a high level of risk and requires sound risk management skills. Some of the investment instruments (e.g., options) involve leverage. Leverage can work against you as well as for you and the possibility exists that you could sustain a loss of some, all or more of your initial investment. Before deciding to trade or invest you should carefully consider your investment objectives, level of experience, and ability to tolerate risk. You should be aware of all the risks and seek advice from an independent qualified investment

advisor if you have any doubts. THIS SITE IS NOT A SUBSTITUTE FOR A QUALIFIED INVESTMENT ADVISOR.

IMPORTANT DISCLOSURE AND NOTES ON DERIVATIVES AND OPTIONS TRADING

- Options involve risk and are not suitable for all investors.
- Prior to buying or selling options, one must receive and read a copy of the “Characteristics and Risk of Standardized Options” booklet. Copies are available at the Chicago Board Options Exchange (CBOE) website www.theocc.com/publications/risks.
- In order to trade strategies, the individual must have an account approved by a broker/dealer to the specific trading level deemed suitable for the level of experience and risk tolerance.
- Sellers of uncovered calls or puts will be obligated to meet applicable margin requirements for certain option strategies.
- Strategies may involve buying and writing multiple options in combinations. Often such combination subjects the individual a level of complexity that poses hidden risks if not analyzed and managed appropriately. Simultaneously transacting option trades in combinations may be difficult and or impossible to execute. The individual must consider other factors, including but the limited to, strategy complexity, trading liquidity, trading platform integrity and market trading hour’s accessibility.
- Options transactions have particular tax considerations. Seek and consult with a tax advisor specialized in this area of investments.
- Examples on the site will not include other costs such as margin interest, commissions and fees. Extensive multiple transactions may incur excessive costs.
- Depending on your options positions in conjunction to other investment combinations, sudden adverse change in market conditions may subject you the risk of forced liquidations by the investment institution holding your positions.
- Options pricing is contingent to a number of factors, including but not limited to, wide bid ask spreads, volatility and volatility premiums, trading liquidity, etc., exposing investors to adverse pricing disadvantages and trade execution risks.
