+ Adjusted hand times (+.24)

& hand time 36.1 + .24 = 36.34 Adjustment from 330yd to 300m = 36.33

hand time 20.6 +.24 = 20.84 Adjustment from 220 yd to 200m = 20.72

* hand time 1:49.8 + .24 = 1:50.04 Adjustment from 880yd to 800m = 1:49.40

For the distance events- no conversions or en route conversions were included on this list except for the 1600m.

This is because the Imie record (a longer distance) was faster than the top 1600m time.

100yd If converted to 100m = 10.43 (Distance is shorter than 100m so conversion cannot be done)
