First Coast Industrial Solutions represents the finest equipment manufacturers and services providers across a variety of industrial markets.

J2B Industrial has more than 50 years of combined experience in industrial construction and fabrication specializing in custom turn-key mechanical packages, pipe fabrication (carbon, alloy, aluminum and plastic), structural steel, miscellaneous steel, welding services, instrumentation and control panels, galvanizing and painting. Located in Jacksonville, Florida, J2B Industrial's state-of-the-art fabrication facility has 30,000 square feet of capacity.

Greentree Transportation and its parent company Transport Investments, Inc. is one of the largest carrier groups in the United States. Based out of Cresson, Pennsylvania, Greentree transports throughout the U.S. and Canada and specializes in over-dimensional heavy haul, flat beds, LTL and pallet shipments. Primary transports include steel, building products, machinery and specialized equipment. No load is too large or too small for Greentree Transportation.

Isotherm, Inc. is a custom manufacturer of heat transfer and refrigeration equipment with over 30 years of specialized heat transfer engineering. Founded in 1999 and based in Arlington, Texas, Isotherm has been a reliable manufacturer of heat exchangers, pressure vessels, and skid-based systems for its domestic and international clients and continues to be the premium manufacturer whose main goal is to establish long term partnerships with its customers.
