Overall objective:

By the end of the session the participants will enrich their knowledge about diverse methods of pain management care.

1. Conduct an assessment and treat chronic pain in patients who use marijuana and alcohol
2. Identify stigma in clinical contexts related to pain and SUD
3. Understand the novel potential benefits of music-based interventions in individuals with pain
4. Discuss osteopathic manipulative treatment for injured and perioperative patients suffering from pain and mobility limitations
5. Comprehend the biopsychosocial factors that impact fibromyalgia and related conditions
6. Appreciate basic opioid prescribing, monitoring and detoxification
