

Through State Appropriation 2944B, the Florida Center for Cybersecurity (aka Cyber Florida) is conducting a statewide critical infrastructure risk assessment to provide actionable recommendations to increase the state's overall preparedness and resilience against cyberattacks.

**AN INITIATIVE TO STRENGTHEN FLORIDA'S CRITICAL INFRASTRUCTURE**

## Help your organization, help Florida become more resilient to cyberattacks

Cyber Florida has partnered with Idaho National Laboratory to leverage their online cyber risk assessment survey platform, the Cyber Security Evaluation Tool (CSET®). The Florida CSET® is 158 questions, roughly two hours, and participation provides several benefits, including:

- **A free custom report identifying areas of concern** that can assist your organization in applying for federal and state cyber-related grants and obtaining cyber insurance.
- **An opportunity to contribute to policy decisions.** The data gathered through this effort will help inform the Florida Legislature for future legislation and resource allocation.
- **Help meeting regulatory and grant requirements.** This assessment complies with many federal and industry assessment standards.

### What counts as critical infrastructure?

Communications	Financial Services
Energy	Chemical
Water and Wastewater Systems	Healthcare and Public Health
Food and Agriculture	Transportation
Critical Manufacturing	Emergency Services
Commercial Facilities	Government Facilities
Dams	Information Technology
Defense Industrial Base	Nuclear Reactors, Materials, and Waste

*Any organization operating in these sectors—public or private—in Florida is eligible for the free risk assessment.*

- **A free Amazon Fire HD tablet.** Each organization that completes the Florida CSET® is eligible to receive one free Amazon Fire HD Tablet.\*
- **Professional cyber subscriptions.** Courtesy of Idaho National Laboratory, a select number of participants will get free access to the CyberKnights skills alignment program and Cyber-CHAMP resource framework.
