

# *Where am I going to get that done?*

## *January 2020 Update*

If you are like me, you run across situations every once in a while, where you need to find a service to do work on or for your old Buick. One of the really nice benefits of belonging to a club, such as ours, is the ability to get help when you need it.

I have found and used several services that have done good and competent work for me. This serves as a starting point to identify those places and individuals that you can call on when the need arises. I would like to run this listing periodically in the Gazette and I would solicit your input for places that you would recommend. Let me know and I'll add them to future listings.
