RE: SPIG Gating End Terminal (SGET) Approval

Mr. Monin:

SPIG Industry, LLC has requested ODOT approval of the SGET anchor assembly system. Based on information previously supplied, ODOT approves the SGET anchor assembly system for use on ODOT projects.

The SGET will now compete with other Type E anchor assembly systems. The SGET system is to be assembled, installed, and refurbished in accordance with the manufacturer's instructions and the plan insert details posted on the Office of Roadway Engineering approved products web page.

This approval requires you to notify the Standards Engineer of any known problems with the product's design or in-service performance. If problems are encountered and are substantiated by FHWA, other states, in service performance evaluation or ODOT evaluation, any product may be unilaterally removed from the approval list.

Respectfully,

Don P. Fisher, P.E.
Roadway Standards Engineer
