The T-Lock connection provides a sucker rod connection on the lower end of the Polished Rod. This allows the connection to be made-up utilizing the same procedure to make-up the sucker rod connections of the rod string.

The T-Lock connection is available on any size or grade of Polished Rod.

A sucker rod or polished rod coupling can be used for this connection.

No special friction wrench is required. The T-Lock connection has wrench flats to assist with the make-up of the connection to the rod string.

Dimensional Data

- 1-1/4" rod x 7/8" Pin = 1-5/8" diameter
- 1-1/2" rod x 1" Pin = 2" diameter

T-LOCK POLISHED ROD PIN CONNECTION
