

- The glossy finish of the rusted mild steel can be refreshed once a year by using a brush to apply one or two coats of a 50/50 mixture of FLOOD Penetrol oil-based paint additive and Klean Strip lacquer thinner. Allow it to dry between coats.

- If the glossy mild steel finish scratches or is rubbed off, let that spot rust. It can be resealed when you re-coat the entire sculpture, if necessary.

- Scratches or grime/build-up on the surface of the stainless steel can be removed using scrub pads, sandpaper (120 grit), or stainless steel wire brushes.

If you have any questions, please feel free to contact me.

Thank you!
