

Spartan Shield Governance Risk and Compliance (GRC) is Acropolis Security's proprietary platform for air gapped and operationally critical environments. It centralizes risk, vulnerability, POA&M, control implementation, evidence collection, and authorization workflows, with real-time visibility across organizations, systems, and programs.

Frameworks: NIST SP 800-53 | NIST SP 800-171 | NIST CSF 2.0 | CMMC

License Comparison	Standard Edition	Enterprise Edition
	Medium-sized organizations	Large organizations
Annual base license	\$48,000 / year	\$96,000 / year 2-year minimum license term
Minimum license term	1 year	2 years
INCLUDED USERS & API ACCOUNTS		
Standard users	5	10
Read-only users	1	Unlimited
Admin-only users	1	Unlimited
Standard API accounts	0	Unlimited
Read-only API accounts	1	Unlimited
ADDITIONAL USERS & API ACCOUNTS / annual price per user or account		
Additional standard user	\$9,000	\$6,000
Additional read-only user	\$3,000	Unlimited
Additional admin-only user	\$1,000	Unlimited
Additional standard API account	\$18,000	Unlimited
Additional read-only API account	\$6,000	Unlimited

Standard and Enterprise Editions: On-premises web deployment | Multiple concurrent users

Enterprise Exploratory Edition

NEW CUSTOMERS | 1-YEAR TERM

Available exclusively to new customers for a **one-year introductory term** to evaluate Spartan Shield GRC. Contact us for exploratory pricing, included users and API accounts, and follow-on licensing terms.

Workstation Edition

COMING SOON

On-premises single-device deployment for smaller organizations; limited to one concurrent user.

Licensing terms. Rates are annual; minimum commitments apply as shown. Contact us for billing options and a quote.

Spartan Shield GRC centralizes cybersecurity governance, risk, and compliance in one on-premises platform.

Manage assets, vulnerabilities, POA&Ms, CTOs, ATO conditions, policies, evidence, and assessments from one place.

Reduce administrative burden, improve audit readiness, and provide leadership clear visibility across organizations and programs.

Frameworks: NIST SP 800-53 | NIST SP 800-171 | NIST CSF 2.0 | CMMC

ATLAS Data Interchange

Acropolis Technical Language for Asset Sharing (ATLAS) provides a portable, structured way to exchange cybersecurity data while preserving context and relationships. It supports file-based transfer, archive, and interoperability across connected or disconnected environments without requiring a direct API connection. Digital signing and encryption help protect authenticity, integrity, and confidentiality during exchange.

Built for Operational Environments

Spartan Shield GRC is designed for organizations that need cybersecurity governance without sacrificing control of their environment or data. Deploy on-premises, operate in disconnected or restricted environments, and integrate through APIs or ATLAS when information needs to move between systems.
