Spartan Shield GRC

Spartan Shield Governance Risk and Compliance (GRC) is Acropolis Security's enterprise-grade on-premises platform designed to streamline cybersecurity compliance for regulated and operationally essential environments. The platform centralizes risk management, vulnerability management, POA&M management, control implementation, evidence collection, and authorization workflows across frameworks such as NIST 800-53, NIST 800-171, NIST CSF 2.0, and CMMC. Spartan Shield GRC reduces compliance burden, increases audit readiness, and provides leadership with real-time visibility into security posture across organizations, systems, and programs.
