

SPARTAN SHIELD GRC

*Based on an independent study, users in a mature environment were over **50% more efficient** when using **Spartan Shield GRC** versus their current tools and processes.*

Utilize Spartan Shield to see vast improvements in the following areas:

ARTIFACT CREATION

FRAMEWORK MANAGEMENT

CHANGE MANAGEMENT

CONFIGURATION MANAGEMENT

CONTINUOUS MONITORING

**AUTHORIZATION TERMINATION
DATE MANAGEMENT**

VULNERABILITY MANAGEMENT

POA&M MANAGEMENT

POLICY BUILDING

REPORTING

RISK ANALYSIS

RISK MANAGEMENT

SECURITY GOVERNANCE

SELF ASSESSMENTS

SYSTEM LIEN MANAGEMENT

**INCIDENT RESPONSE/CYBER
TASKING ORDER MANAGEMENT**

ABOUT US

Acropolis Security is a small research and software development company founded by cybersecurity experts. Utilizing their expertise, the founders develop cybersecurity software designed to harden systems and mature cyber programs in the most important and demanding environments: The Department of Defense. With a focused passion for national security, the Acropolis team works tirelessly to develop software to protect all our assets at home and abroad.

WHY CHOOSE US

Acropolis Security's software reflects the expertise of cybersecurity professionals. This ensures efficient development, precise solutions that "get it right the first time," and industry-leading tools - all fueled by a deep understanding of client challenges. Acropolis blends modern capabilities and unique methods to fill industry gaps and enhance software performance.

VULNERABILITY MANAGEMENT

“Cybersecurity and data protection is a top area of concern, with 70% of chief audit executives ranking cyber risk as high or very high at their organizations.”*

Spartan Shield's built in capabilities make Vulnerability Management easy

- Host Administration
- Scan Management
- Vulnerability Analysis
- Vulnerability Delta Analysis
- POA&M Management
- Trend Analysis

FORTIFY YOUR ENVIRONMENT

Identify and manage assets

- Track all your hosts on your network
- Track software down to the exact version on all your assets

Understand your likelihood of being compromised

Verify remediation efforts and vulnerability trends over time

FORTIFY YOUR PERSONNEL

Automate Plan of Action and Milestones

Spend more time hardening systems and less time pushing paperwork

Standardize vulnerability management processes across vast enterprises

RISK MANAGEMENT

“57% of senior-level executives rank “risk and compliance” as one of the **top two** risk categories they feel least prepared to address.”*

Spartan Shield's built in capabilities make Risk Management easy

- Framework Management
- Framework Audit
- Vulnerability Analysis
- Vulnerability Prioritization
- Native Policy Builder
- Risk Analysis
- Risk Management
- Remediation Management
- POA&M Management

FORTIFY YOUR RISK MANAGEMENT

Apply a unified framework (NIST 800-53, 800-171, CMMC) with intuitive workflows for efficient control validation

Simplified compliance allows more time for precise risk analysis

Standardize risk analysis and prioritize risks with the Plan of Actions and Milestones (POA&M) module

FORTIFY YOUR WORKFORCE

Format and standardize security policies across the entire organization with automatic reminders for reviews

Enforce the Change Management process

Make Self-Assessments easy with an intuitive interface and simple workflows

SECURITY GOVERNANCE

“Over 75% of executives report that their organizations either have no method to measure cyber risk (49%) or they don’t know if their organization measures risk exposure (27%)”*

Spartan Shield's built in capabilities make Security Governance easy

- Common Control Packages
- Trend Analysis
- Risk Assessments & Management
- Change Management
- Task Management
- Control Validation
- Asset Management
- Framework Compliance
- Data Management

FORTIFY YOUR ENTERPRISE

Standardize compliance and risk calculation with NIST 800-53, 800-171, CMMC frameworks

Efficiently utilize Common Control Packages for unified enterprise-level standards and centrally manage policies to save man-hours

Create standards at the Enterprise level and watch the work force perform like never before

FORTIFY YOUR LEADERSHIP

Native reports, dashboards, and trend analysis provide up-to-date insights for strategic high-level decisions

Leadership stays informed with automated reporting enabling accurate decisions

Informed enterprise-level choices drive standardization, efficiency, reduced costs, and innovation

INCIDENT RESPONSE/CYBER TASKING ORDER (CTO) MANAGEMENT

"It takes an average of 277 days for security teams to identify and contain a data breach."*

Spartan Shield's built in capabilities make Cyber Tasking Order easy

- Incident Tracking
- IAVM Detection Automation
- Response Planning
- Full Spectrum CTO Workflow
- External Reporting Capability

FORTIFY YOUR INCIDENT RESPONSE

Critical workflows for targeted vulnerabilities and Enterprise-wide data calls

IAVM detection automates the vulnerability review process for high profile vulnerabilities

Expedite the timeline for remediation of high profile vulnerabilities

Limit the amount of exposure for your enterprise

Utilize Spartan Shield to notify, review, and track incidents

Native dashboards keep leadership informed of critical vulnerabilities throughout the Enterprise

*"Cost of a Data Breach 2022," a report released by IBM and Ponemon Institute.
