See below to review a sample list of premium products that may be considered for your project once a site audio needs assessment has been conducted.

A written and binding project estimate will be provided after your site audio needs assessment has been conducted.

**Mini180 synergy
horn speakers**

The Mini180 takes the 8" coaxial driver from our SHMini and utilizes a pair of them in a unique layout for a 180 degree wide x 90 degree vertical coverage pattern. At home in theme parks and other various distributed system configurations the danley speakers Mini180 is a very unique audio tool.

SH DFA

The danley speakers SH DFA is an asymmetrical horn designed to seamlessly integrate with the SH50 with mounting brackets. The SH DFA fits the exact footprint of the SH50 and is only 13" high.

SH110

The danley speakers SH110 is a 2-way, passive loudspeaker designed as a front fill. The SH110-4 includes 2 x 8" low-frequency drivers and a 1.4" exit high frequency compression driver, all mounted within a single 110° x 60° horn.

P.S. This document can provide more or less detail of both products and services
