

# DISCOVER A HIDDEN GEM

## Our Process

### Initial Consultation:

The initial consultation focuses on building a strong foundation for tutoring success. We meet the child to establish rapport, observe their learning style, and conduct an academic assessment to identify strengths and areas for growth. We also get to know the family, discussing their child's goals, challenges, and aspirations. By familiarizing ourselves with the learning environment and aligning with the family's priorities, we create a personalized plan to support the child's academic progress.

### Contract and Scheduling:

After the initial consultation, we review the assessment results, discuss the recommended tutoring plan, and address scheduling and pricing details. Once all agreements are finalized, we sign the contract and set a start date, ensuring everything is in place to begin supporting your child's learning journey.

### Begin Your Learning Journey:

This is where the magic happens! Each session includes engaging instruction, written progress reports, and take-home practice to reinforce learning. Progress is monitored through exit tickets and monthly assessments, ensuring steady growth. Parents are encouraged to share school feedback, such as progress reports, parent-teacher conference updates, and prior work, to keep the learning aligned and effective.
