To order Iron Sucrose for administration by Intravenous Infusion, complete the attached Referral Form and fax it to BioPro Biologics Pharmacy
This Fax Form is the prescription for iron sucrose as well as the order for IV administration at MedInfuse Health Infusion Clinic

BioPro Biologics Pharmacy will coordinate and facilitate the following:

1. Contact the patient to explain the process and educate the patient on the benefits and potential side effects of iron infusion therapy
2. Fill the prescription and arrange an infusion appointment time and adjudicate the payment of Iron Sucrose via the patient's health plan as applicable and/or collect payment.
3. Appointment time is scheduled with the patient to receive the Iron Sucrose infusion at MedInfuse Health Infusion Clinic
4. Prior to the infusion appointment, the patient is contacted with instructions to prepare for the infusion including recommendations for proper hydration and laboratory measurements are checked to ensure they are within limits and there are no contraindications to therapy.
5. Infusion is administered by a Registered Nurse after assessing appropriateness of therapy and laboratory measurements while adhering to safety protocols and guidelines for IV infusions according to the prescribed order by the physician
6. Infusion duration will be as prescribed and/or adjusted as appropriate for the patient based on age, comorbidities, and tolerance/response
7. Patients are observed for 15-30 minutes after the infusion
8. Notification of date/time of infusion is sent to prescribing physician if requested

Note:

- 1. A physician is available for all IV iron infusion appointments**
- 2. We help the patient obtain any coverage available to them. Most patients who have pharmacare or a private insurance plan are eligible for coverage**
- 3. The patient is overseen by an interdisciplinary team of physicians, registered nurses, and pharmacists. Our staff are trained to respond to any reaction that may occur as a result of IV iron administration**
