

The Swan (Radcot)Cruiser Club

Boat Lifting Operations.

General Health & Safety Instruction issued to Members

During crane out and in, members are asked to abide by the following instructions in order to ensure everyone's safety, as far as possible.

Unless you are directly involved in assisting the crane crews, stay out of the lifting area and away from the cranes.

If you feel you want to help please approach the crane supervisor who will allocate you to a task.

Cars are to be parked in the designated area. No vehicles are to be parked on the track until both cranes have departed.

Members children must not be allowed to run around the field.
Please keep dogs on a lead.

All boat must have third party insurance.

It is the owners responsibility to provide suitable chocking material and props.

You must not sit or work on your boat whilst other boats are being lifted around you.

It is the owners responsibility to be in attendance when his/her boat is lifted. A representative should be appointed if you are unable to attend and the crane out/in organiser informed. It is not the committees responsibility.

There will be safety officer/s on site. If they ask you to move or to stop doing something it will be for a good reason please follow their instructions.

All crane crews must wear appropriate PPE, especially hard hats.

If we all bear these points in mind and treat the area with respect we can hopefully complete the job safely with no personal injuries.

After crane in you are expected to clear the area, around where your boat stood, of rubbish and debris.

Failure to follow the above advice could result in you being refused crane out in the future.

By completing your crane out application you are agreeing to these conditions.
