

## We've evolved

In 1990, we founded our business to cater to the do-it-yourselfer and homeowner by offering a kiln dried, handpeeled product direct from the sawmill. Clients had flexible purchase power. They could buy one log or 10,000 direct from the sawmill.

*Choose from FIVE Full log corner options*

*Handpeeled or rustic hewn finishes*

## Our clients wanted more

Today, we offer you a full service home company because we were asked to do so. Homeowners recognized the value of our seasoned staff guiding you through the building process. They experienced the attention to detail and personal service that saved them money. They saw the advantage in dealing with a company that produces the product line. We control the quality, the inventory, the price.

## Meet with us

We want to meet you and share in this journey. We'll educate, explain and give you the tools to ask informed questions. We'll work with you on your budget, the process and the expectations. We want to be your partner.

*Enjoy the warm, secure look that will last a lifetime*

*Complete line of top quality accessories*

Call us. We want to build your vision.

*Our True Half-Log siding is produced by actually cutting logs in half—maintaining the natural contours*

**Residential, Commercial, Renovational, Specialty Wants: we'll point you home.**

**Build with a  
company that was  
built on quality**

We started this company peeling one log at a time. It was a simple concept: give the client a product that will last generations. Fast forward years of experience and investments in state-of-the-art kilns, and we assure you that you get the best service and materials in the industry.

Our logs are milled to exact specifications, stored under shed roofs, dipped in a preservative and most importantly, kiln-dried.

We take care of the details.

*\*Ninety percent of other log manufacturers still do not provide the kiln-dried advantage.*
