 Instituto
AÇO CEARENSE

Our journey has been built on courage and non-negotiable values such as **humility** , **safe work** , **integrity** , **focus** , **determination** , and **faith in God**, which drives us to pursue a different country.

Grupo Aço Cearense is built of companies in **perfect synergy** , finding in steel our true vocation. Our companies operate in **metallurgy** , **steelmaking** , **logistics** , and the **commercial sector** , in addition to our **social commitment** , carried out through Instituto Aço Cearense.

Focused on regional expansion and on the growth of people and clients, our teams work with expertise, supported by an integrated system that ensures agile, high-quality solutions with competitive prices and environmental preservation.

Aço Cearense combines strength with outstanding service and fast delivery, bringing steel with dynamism and excellence to every corner of the country. At the industrial headquarters, the focus is on producing flat steel, with an **annual production capacity of 676 thousand tons of steel**, making it the largest welded tube manufacturer in South America. Focusing on our customer's experience, we have enhanced our logistics intelligence, which unifies the entire service chain, operating across all Group companies.

In 2025, we handled **almost 57 thousand vehicles and delivered over 1,291,976 tons of steel**.

To complete the production chain, our commercial intelligence has the structure and sales strength that position the Group as one of the largest independent distributors, processors, and producers of steel and its derivatives in Brazil.

SINOBRAS

SINOBRAS our long steel producer, has expanded its production capacity to 876 thousand tons/year, starting the production of two new products: Wire Rod and Rebar, offered in Coil and Spooler formats. With the purpose of developing a metalworking and mechanical hub in the region, SINOBRAS established a partnership with Vale for the New Steel Mill, focusing on the production of billets and steel in Marabá (PA).

Business strategy

>> Service for small
businesses as a
strategic differentiator

>> Operational
efficiency

>> Personalized support
for clients, helping
drive business growth

innovation as a path

Innovation is part of our DNA. That's why transformation is always present here, driving every aspect of our business strategy.

PROGRAMA
INOVAR
promovendo ideias, criando soluções

Seeks solutions to the challenges faced by the Group's companies.

A digital laboratory whose purpose is to develop future business opportunities in an agile and collaborative way.

Always integrating sustainability into our business

We are on an ESG journey with the purpose of generating greater value for both the business and society.

Through circular economy practices, we have become the largest recycler of steel scrap in Brazil's North and Northeast regions, through SINOBRAS.

Our companies run programs that continuously improve process efficiency through reuse, rainwater harvesting, and reverse logistics.

Regarding climate mitigation and adaptation, we conduct a Greenhouse Gas (GHG) emissions inventory, which shows that our carbon intensity is 10 times lower than the national average in the steel sector.

Our forestry units are responsible for carbon removal through the growth of eucalyptus forests (absorbing CO2 from the atmosphere), with an estimated annual removal of around 560 thousand tons of CO2.

We have a strong culture of health and safety.

Awards and Recognition

Gold GHG Protocol

We received the Gold Seal from the Brazilian GHG Protocol Program, the highest recognition for transparency and management of greenhouse gas (GHG) emissions.

CASACOR Ceará 2024

Esp. Aço Cearense, a space designed by architect Elias Petruço at CASACOR Ceará 2024, won 1st place in the Art category..
